# **CHAPTER - I**

# **BRIEF SUMMARY**

### **INTRODUCTION**

Roopnagar with its population of 49,159 persons is the 20th District in the State of Punjab in North West India. In order to develop Roopnagar city and its surroundings in orderly manner and recognizing the need for regulating the development of the entire influence area of Roopnagar City, Government of Punjab declared the Roopnagar Local Planning Area (LPA, Roopnagar) in May, 2008 and Amendment notification no: 12/71/06-4HGI/750 Dated 27-02-09. The Local Planning Area, Roopnagar includes 129 villages and one urban settlement i.e. Roopnagar. The Government also designated the Chef Town Planner, Department of Town and Country Planning, Punjab as the Planning Agency vide Notification No. 12/71/06-4HGI/3230 Dated 09-05-2008 to prepare the Master Plan of LPA, Roopnagar.

The total area of LPA, Roopnagar is 24265 hectare. According to Census 2001, the total population of LPA, Roopnagar is 1, 36,279 persons out of which 87,120 persons are rural and 49159 persons is urban.

### **Regional Setting**

Roopnagar district, included in the Patiala Division of Punjab falls between north latitude 30°-32' and 31°-24' and east longitude 76°-18' and 76°-55'. Roopnagar (formely known as Ropar Town) is a district headquarter. It is 42 Kms from Chandigarh, the state capital of Punjab. The district adjoins Nawanshahar, Mohali and Fatehgarh Sahib Districts of Punjab. The district comprises of 3 Tehsils, namely Roopnagar, Anandpur Sahib and Chamkaur Sahib and includes 617 villages and 6 towns namely Roopnagar, Chamkaur Sahib, Anandpur sahib, Morinda, Kiratpur Sahib and Nangal.

#### **Historical Background**

The town of Roopnagar is of considerable antiquity. The town is said to have been founded by a Raja called Rokeshar who ruled in the 11th century and named Roopnagar after his son Rup Sen. The recent excavations carried out at Roopnagar have proved that this town was the seat of well developed Indus Valley Civilization. In proto - Historic Punjab perhaps Roopnagar is the only known excavation site which can claim the status of a small town or city. The founds in recent excavations consists of earthenware, statues, coins, etc. That proves that the city dates back to Harrappa - Mohenjo-Daro civilization which crossed Satluj River. Many of them settled at this place. In the excavations many things found belongs to Chandra Gupta, Kushan, Hoon and Mughal period. One of rare finds is a seal of Marble on which there are three letters engraved in Sindhi script. One of the finds is the statue of a woman dressing her hair. All these prove that even the people living in this town 4000 years back , were fully civilized and well cultured.

The history of Roopnagar district is in fact the war of Guru Gobind Singh Ji against Mughal tyranny, exploiters and social evils. It is here in this district at Sarsa Nangal that the great Guru parted with the family and proceeded to Chamkaur Sahib where two elder Sahibzadas laid down their lives fighting for truth and Guru Sahib left for Machhiwara on a constant struggle.

#### Legal Framework

The Punjab Regional and Town Planning and Development Act, (Amended) 2006, provides the legal framework for preparation of Master Plan. The four stage process involves decalaration of Local Planning Area, designation of Planning Agency, preparation of present land use map and preparation and approval of Master Plan. The contents of the Master Plan as laid down by the Act are;

- (a) Broad indication of the manner in which the land in the area should be used.
- (b) Allocation of areas or zones of land for use for different purposes.
- (c) Indication, definition and provision of the existing and proposed highways, roads, major streets and other lines of communication.

- (d) Indication of areas covered under heritage site and the manner in which protection, preservation and conservation of such site including its regulation and control of development, which is either affecting the heritage site or its vicinity, shall be carried out.
- (e) Regulations to regulate within each zone the location, height, number of storeys and size of buildings and other structures, open spaces and the use of buildings and structure. The Act also provides for "Control of Development and Use of Land in Area where Master Plan is in Operation"

#### Population growth

The population of LPA, Roopnagar has been recorded as 1,35,947 persons as per census data (2001) with a decadal growth rate of about 22.23% during the year 1991-2001. The details are summarized in the table below

|                   | PC        | POPULATION |        |         | <b>GROWTH RATE IN %</b> |  |
|-------------------|-----------|------------|--------|---------|-------------------------|--|
|                   | 1981      | 1991       | 2001   | 1981-91 | 1991-2001               |  |
| PUNJAB STATE *    |           |            |        |         |                         |  |
| TOTAL             | 16.79     | 20.28      | 24.36  | 20.79   | 20.12                   |  |
| URBAN             | 4.65      | 5.99       | 8.25   | 28.82   | 37.73                   |  |
| RURAL             | 12.14     | 14.29      | 16.11  | 17.71   | 12.74                   |  |
| * POPULATION IN N | MILLLIONS |            |        |         |                         |  |
| LPA, ROOPNAGAR    |           |            |        |         |                         |  |
| TOTAL             | 84211     | 111222     | 135947 | 32.07   | 22.23                   |  |
| URBAN             | 25165     | 37996      | 49159  | 50.91   | 29.38                   |  |
| RURAL             | 59046     | 73226      | 86788  | 24.01   | 18.52                   |  |

#### Population Growth Rate of Punjab State and LPA, Roopnagar: 1981-2001

Source: Census of India, Punjab 1981, 1991, 2001,

The average gross population density of Roopnagar City is 19.66 persons per hectare. However ward wise densities vary considerably. The highest and the lowest are being 84 persons per hectare in ward no. 4 and 14 persons per hectare in ward No. 16 respectively.

#### **Employment**

The work force participation rate of LPA, Roopnagar is 36 % and that of Roopnagar City is 31.22%. The sectors providing employment in Roopnagar City are cultivators (1%), Agricultural labourers (1.61%), Household industries (1.12%) and other are (96.27%)

#### **Existing Land Use and Transport Network**

Preparation of present land use map was undertaken with the help of Punjab Remote Sensing Centre (PRSC), Ludhiana. For the core built up area Quick Bird data of 0.6m resolution was used, where as for the outer areas Cartosat I data of 2.5 m resolution was used. The maps based on satellite imageries were updated by undertaking field surveys. Out of a total LPA Roopnagar area of 24131 hectares (as calculated by PRSC) maximum proportion is occupied by 21680.377 hectares by agricultural use, 1088.849 hectare followed by residential, 238.539 hectares by industrial and 354.352 hectares by transport. In case of Roopnagarr City out of a total area of 964.92 hectares (as calculated by PRSC) 207.671 hectares are occupied by residential use, 0.376 hectares by industrial use, 43.513 hectares by public & semi public use, 114.453 hectares by transport use and 423.39 hectares by agriculture use.

The regional road network comprises of Chandigarh-Manali Road (N.H - 21), Roopnagar-Hoshiarpur road (S.H -24), Kurali-Morinda (S.H.) road and a bypass which interconnects all above roads. Other less important roads are Roopnagar-Chamkaur Sahib road, Roopnagar-Morinda road, Roopnagar-Nurpurbedi road. Although the Right of Way (ROW) of these roads outside the municipal area varies between 18ft to 180ft, the effective carriageway varies between 17ft to 74ft.

#### **Physical Infrastructure**

Water for Roopnagar City is sourced from both ground water and canal water. Quality of ground water is not satisfactory so mainly canal water is supplied. At present the water treatment plant of 1.4 mgd in an area of 1.75 acres is located in Giani Zail Singh Nagar . It supplies water to the old city . At present there are 8 nos.of OHSRS in various parts of the city in order to maintain the required water head. In order to meet the water requirement of the city , the water is also lifted from Nangal Hydel Channel and treated in the various treatment plants.

As per data supplied by water supply and sanitation deptt., there are 17 water supply and sewerage schemes in various parts of the city and the total length of water supply lines laid in the city is 22352 mts and the length of existing sewerage lines is 15628 mts .

The sewerage treatment plant which caters for the treatment of sewerage water of the entire city is located in Shri Har Gobind Nagar. As far as solid waste management is concerned, the Municipal Council has been using a plot of 1.5 acres in village Katli for dumping the solid waste.

The low lying areas of the city are flood prone during monsoon due to absence of planned storm water drainage and further letting flood waters into sewers is environmentally undesirable.

Though collection and transportation of solid waste is managed by the Municipal Council, disposal is not in the form of sanitary land fill as required by the Municipal Solid Waste Rules of the Ministry of Environment and Forest. Similarly the disposal of Bio-Medical waste too is not in compliance with relevant rules.

### **Population forecast**

The population of LPA, Roopnagar is estimated to grow to 2, 20,000 persons where as population of Roopnagar City will be 85000 by 2031.).

#### **Infrastructure Requirements**

The infrastructure requirements of this growth by 2031 would be,

- (a) Water demand:154 Mld (Potable 104mld and recycled 50mld)
- (b) Wastewater: 115 Mld

#### **Vision 2031**

Specially constituted "Think Tank" comprising official and non-official representatives from all walks of life articulated the Vision 2031 for:

The strategies to attain this vision would require spatial land use planning, infrastructure planning and financing, enabling private investment in economic growth, ensuring environmentally sustainable development etc. The role of Master Plan in this regard would be that of facilitating a spatial land use planning framework conducive to attaining the vision.

Visualizing the future structure of the city involves delicate trade-offs. If urban development is freely permitted anywhere it might lead to sprawl that is difficult to service in terms of infrastructure services and may cause loss of fertile agricultural land. On the other hand if the future structure is visualized as compact city that is easier to service, it might increase the land price where development is permissible and might cause unauthorized development where it is not. The extent of urbanization visualized is therefore not narrowly linked to land required for accommodating the projected population and economic activities by 2031. The extent of urbanization defined is based on the land requirement for various urban land uses, transport network that would be desirable and the areas that would acquire development potential on account of such transport network.

#### Proposed Land Use and Road Network

In the light of the above approach, proposed land use and road network plans are incorporated in the Master Plan. The land in LPA, Roopnagar has been zoned for Residential, Commercial, Industrial, Rural and Agricultural purposes. Further, areas have been designated for important specific purposes like Public Utilities, Bus Stand, Truck Stand, Institutional, green buffer along existing Bye pass. However specific designations for public purposes like schools, hospitals, playground etc have not been earmarked. The major road network has been proposed has been shown in drg. no. DDTP (R) 45/2011 dated 12.08.2011.(This drawing is superimposed on previous drawing no: DDTP (R) 09/2010 dated 15.08.2010.) It is proposed to follow up the Master Plan preparation by more detailed zonal plans.

#### **Zoning Regulations**

The Punjab Regional Town Planning & Development (Amended) Act, 2006 provides for the "Control of Development and Use of Land in Area where Master plan is in Operation". However for control of development through parameters like sub-division of land, ground coverage, FAR, parking requirements, norms for building construction etc. have already been notified on a state wide basis by the Government. The zoning regulations included in the Master Plan are therefore confined to use of land.

# **CHAPTER -II**

# 2. INTRODUCTION

Roopnagar District is one of the 20th districts in the State of Punjab in the North-West India. The district of Roopnagar is named after its district headquarters, the town of Roopnagar. Formerly known as Roopnagar, the town of Roopnagar is said to have been founded by a Raja called Rokeshar, who ruled during the 11th century and named it after his son Roop Sen. The town is of considerable antiquity. Recent excavations and explorations conducted at Roopnagar indicate that the first civilized folk to settle here were the Harappans, who apparently reached the upper Satluj towards the close of third millennium B.C. Roopnagar District was carved out on Ist November , 1966 at the time of re-organization of the State. The District has rich historical and religious significance behind it.

### 2.1 LOCATION

Roopnagar district, included in the Patiala Division of Punjab falls between north latitude 30°-32' and 31°-24' and east longitude 76°-18' and 76°-55'. Roopnagar (formerly known as Ropar town) is a district headquarters. It is 42 Kms from Chandigarh, the state capital of Punjab. The district adjoins Nawanshahar, Mohali and Fatehgarh Sahib Districts of Punjab. The district comprises of 3 Tehsils namely Roopnagar, Anandpur Sahib and Chamkaur Sahib and includes 617 villages and 6 towns namely Roopnagar, Chamkaur Sahib, Anandpur sahib, Morinda, Kiratpur Sahib and Nangal. All the towns except Chamkaur sahib fall on railways line. The Satluj river passes close (2 to 5 km) to the towns of Nangal, Roopnagar and Anandpur Sahib.

### 2.2 <u>Initial Steps</u>

As a first step towards the preparation of Master Plan of Local Planning Area (LPA), Roopnagar, has been delineated and notified U/S 56(1) of "The Punjab Regional and Town Planning and Development Act (Amended),2006" in the official gazette vide notification no.12/71/2006-4HGI/750, dated 27/02/09. The Local Planning Area, (LPA) Roopnagar includes one city and 129 villages. This Planning area spreads over an area of

24265 hectares (59960 Acre) serving a population of 1,35,947 persons. The detail of all settlements covered under the jurisdiction of LPA, Roopnagar is given in An nexure -1.

While delineating the LPA, Roopnagar the following factors mentioned in rule 22 of the Punjab Regional and Town Planning and Development (General Rules 1995) have been considered:

- Administrative boundary limits of the villages, the tehsils, the districts, and the state have been followed for better identification and management of the Local Planning Area, Roopnagar
- Geographical features of the area like Canal network and drainage .
- For better accessibility, the means of transportation and communication have been considered for better development of the area.
- The present and future growth trends and distribution of the population is another important factor considered for delineation of this area.
- Economic base and commercial activities of the city and their surrounding areas are also taken care of.
- Urban expansion trends and management of periphery areas for ecological and environmental balance have also been kept in view.

### 2.3 <u>HISTORICAL BACKGROUND</u>

The town of Roopnagar is of considerable antiquity. The town is said to have been founded by a Raja called Rokeshar who ruled in the 11th century and named Roopnagar after his son Rup Sen . The recent excavations carried out at Roopnagar have proved that this town was the seat of well developed Indus Valley Civilization. In proto - Historic Punjab perhaps Roopnagar is the only known excavation site which can claim the status of a small town or city. The founds in recent excavations consists of earthen wares, statues, coins, etc. That proves that the city dates back to Harrappa - Mohanjodaro civilization which crossed Satluj river. Many of them settled at this place. In the excavations many things found belongs to Chandra Gupta, Kushan, Hoon and Mughal period. One of rare finds is a seal of Marble on which there are three letters engraved in Sindhi script. One of the finds is the statue of a woman dressing her hair. All these prove that even the people living in this town 4000 years back, were fully civilized and well cultured.

Many historians are of the view that when the first man descended from the mountains in the North to plains, he settled down at Roopnagar. A Mount is still preserved by the Archeology Department at Roopnagar.

S. Hari Singh Rais of Sialba conquered Roopnagar in 1763 A.D. and established his state . His son Charat Singh made Roopnagar capital of the state.

After the fall of Sirhind in 1763, Roopnagar came under the sikhs Chief Hari Singh. The most famous ruler of Roopnagar state was Raja Bhup Singh, who fought in the anglo-sikhs war of 1945. on the side of Maharaja Dalip Singh, the minor successor of Maharaja Ranjit Singh , against the British. Consequently, after the victory of the British, Roopnagar state of Raja Bhup Singh was confiscated.

The history of Roopnagar district is in fact the war of Guru Gobind Singh Ji against Mughal tyranny, exploiters and social evils. It is here in this district at Sarsa Nangal that the great Guru parted with the family and proceeded to Chamkaur Sahib where his two elder Sahibzadas laid down their lives fighting for truth and Guru Sahib left for Machhiwara on a constant struggle.

The other important historical place in this District is Kiratpur Sahib situated on the banks of the river Satluj. This town was established by 6th Guru Shri Guru Har Gobind Singh Ji after buying Land from Raja Tara Chand of Kehloor through Baba Gurditta Ji. It is said that Guru Nanak Dev Ji made a professy regarding the establishment of this place. It is here at this place that Guru Nanak Dev Ji met saint Buddan Shah in a Jungle. It is here in Sheeshmahal that Guru Hargobind Sahib stayed from Sammat 1691 till the end came. Shri Guru Har Rai Ji and Shri Guru Harikrishan Ji were also born at this place and they were blessed with Guru Gaddi at this place. It is here at Gurdwara Patalpuri Sahib that Sikhs from all over the world immerse the ashes after death. Even the Babhuti of Shri Hari Krishan Ji was brought form Delhi and established at this place. About a half-mile away form Kiratpur Sahib the Takia of Saint Buddan Shah is situated.

Anandpur Sahib, a historical town in this district was founded by 9th Guru of Sikhs Shri Guru Teg Bahadar Ji after buying Land in Village Makowal in 1723 A.D. It is at this place that the great 9th Guru performed penance to commemorate the gurudwara Bhaura Sahib built at Anandpur Sahib. It is also here at Anandpur Sahib that Kashmiri Pandits approached 9th Guru to save them from Mughal Tyranny. Acceding to their request on the motivation of Guru Gobind Singh Ji , Shri Guru Teg Bahadar Ji left for Delhi to make Supreme Sacrifice. At Anandpur Sahib the great 10th Guru of Sikhs Shri Guru Gobind Singh Ji spent his early age. It is here that the great Guru mastered the use of arms in Kila Anandgarh Sahib.

Further it was at Anandpur Sahib in Roopnagar District that Shri Guru Gobind Singh Ji created Khalsa in 1699 on Baisakhi Day and brought about a cultural revolution. It was the most important landmark in the history of sikhs. The Khalsa created by Guru Gobind Singh Ji later on acquired the sovereign power of Punjab under Maharaja Ranjit Singh . The creation of Khalsa at Anandpur Sahib is the most important event not only in history of Roopnagar district, but also in the history of the Sikhs and Punjab. Gurudwara Keshgarh Sahib at Anandpur Sahib still commemorates the memory of the historical event as Guru created Khalsa at this place.

Another most important landmark historic event had been added to the history of the district, when in April 1999, 300th Birth of Khalsa was celebrated at Anandpur Sahib. Besides lacs of people from all walks of life from all over of the world, heads of important religious, social, political and administrative personalities participated in the Tercentenary functions and paid obeisance at Gurudwara Takhat Shri Keshgarh Sahib. Historic City of Anandpur Sahib has been developed as tourist center. Khalsa heritage Memorial complex is being constructed.

### 2.4 **Physiography and Climate**

The climate of Roopnagar District is characterized by general dryness (except in the south-west monsoon season), a hot summer and a bracing cold winter. The year may be divided into four seasons. The period from about middle of November to February is the cold season. This is followed by the summer season from March to about the end of June. The south-west monsoon season commences late in June and continues up to about middle of September. The period from mid September to the middle of November constitute the post-monsoon or transition season. The temperature ranges from minimum of 4° C in winter to 45° C in summer. May and June are generally hottest months and December and January are the coldest months. Relative humidity is high, averaging about 70 percent during monsoon. The average annual rainfall in district is 775.6 mm. About 78 percent of the annual rainfall is received during the period from June to September. The soils of the District vary in texture generally from loam to silty clay loam except along the Sutlej River and chos where some sandy patches may be found. Chamkaur Sahib and Kharar blocks have sodic soils. The soils of Anandpur Sahib and Roopnagar blocks are undulating.

### 2.5 <u>CITIES / TOWNS IN ROOPNAGAR DISTRICT</u>

### 2.5.1 Roopnagar

Roopnagar city also has the status of district headquarters with the creation of Roopnagar District on Ist Nov, 1966. Situated on the bank of river Satluj, Sirhind canal passes through the heart of the city. It was formerly known as

Ropar.

The town of Roopnagar occupies a prominent place in the ancient and medieval history and has an importance in modern history too. Recent excavations suggest that Roopnagar was one of the oldest towns in the Punjab. The relics excavated from a mound, known

as Nalagarh Tibbi near the Government College reveal that the town had flourished in the past with a very advanced civilization similar to Harappa and Mohenjodaro Civilization.

The small city of Roopnagar occupies a prominent place in the modern history also. It was here under a "Peepal Tree" that a memorable meeting between Maharaja Ranjit Singh and Lord William Bentick took place on 26th October, 1831 during which various boundary issues were settled.

Near the Roopnagar Headworks there is a Tourist Bungalow and Boating Complex known as Pincassia, run by Punjab Tourism Development Corporation. The complex provides boarding and lodging facilities to the visitors and has a restaurant and beer bar.

Almost all the district offices which were scattered in different parts of the town have been concentrated in a single building known as Mini Secretariat'.

The city has many worth seeing sites in and around it, such as Head Works, Pincassia Boat Club, Treaty Place of Maharaja Ranjit Singh and Lord William Bentick, Site of Indus Valley Civilization, Maharaja Ranjit Singh Bagh, Gurudwara Bhatha Sahib and Gurudwara Sadabarat.

### 2.5.2 Anandpur Sahib

On the left bank of the Sutlej river, 40 kilometers from Roopnagar town, is situated Anandpur Sahib, the "abode of bliss". In the background is the Naina Devi range. The town of Anandpur Sahib was founded by Guru Teg Bahadur, the ninth Sikh Guru. The Guru had left Baba Bakala in the Amritsar district and purchased the land from the Raja of Bilaspur.

It was also at Anandpur Sahib that Kashmiri Pandits approached ninth Guru to save them from Mughals tyranny. Acceding their request on the motivation of Guru Gobind Singh Ji, Shri Guru Teg Bahadur Ji left for Delhi to make Supreme Sacrifice. At Anandpur Sahib Great tenth Guru of Sikhs Guru Gobind Singh Ji spent his early age. It was here that great Guru mastered the use of arms in Kila Anandgarh Sahib.

The most important of the complex of shrines at Anandpur Sahib is Gurudwara Keshgarh Sahib, which stands on the place where the "Khalsa" was born. It is regarded as one of the five sacred "Takhats" or seats of Sikh religion. In 1699, on the Baisakhi day (13th April), Tenth Master Guru Gobind Singh Ji created Khalsa by baptizing five beloved Sikhs known as "Panj Piaras".

The Holla Mohalla of Anandpur Sahib is an out standing festival of the Sikhs, which is celebrated with great pomp and show on the day following the Holi festival.

Guru Gobind Singh came to this town in

1674 when he was only eight years old and he spent about 25 years, the major part of his life in Anandpur Sahib. The town became the rallying point of his struggle against Mughal oppression and the surrounding areas, were scene of many a battle. It was here that the Guru introduced a new form of baptism and called baptised Sikhs as 'Khalsa' or the pure ones, giving them the common surname Singh (lion). The town has a number of Gurudwaras like Gurudwara Keshgarh Sahib, Gurudwara Manji Sahib, Gurudwara Sis Ganj, Gurudwara Bhora Sahib, Gurudwara Anandgarh Sahib and Gurudwara Mai Jito associated with the ninth and tenth Gurus of the Sikhs.

The famous Sri Dashmesh Academy and Guru Teg Bahadur Museum are also situated at Anandpur Sahib.

It is worth mentioning that the

Birth Tercentenary of Khalsa was celebrated during April 1999 at Anandpur Sahib in which important dignitaries from all walks of life from all over the world including Vice President of India, Prime Minister of India and various other political and religious leaders participated. Anandpur Sahib, the birth place of Khalsa has also been developed as a tourist center. It has also been made "White City".

# 2.5.3 Chamkaur Sahib

Situated on the banks of Sirhind Canal, Chamkaur Sahib is at a distance of 15 km from Morinda and 16 km from Roopnagar. Guru Gobind Singh and his two elder sons and 40 followers had come to this place from Kotla Nihang with his pursuers close on his heels. They came in the garden said to be of Raja Bidhi Chand, where now Gurudwara Damdama Sahib stands. There are several Gurudwaras at this place marking the visits and halts of Guru Gobind Singh.

Gurudwara Katalgarh Sahib also known as Gurudwara Shahidganj. Occupies a unique place among all the Gurudwaras located at Chamkaur Sahib. It is built at the site where Baba Ajit and Baba Jhujhar Singh, elder sons of Guru along with his 37 followers fell fighting against the Mughal Army.

# 2.5.4 Kiratpur Sahib

Situated on the bank of river Sutlej, Kiratpur Sahib is at a distance of about 10 km from Anandpur Sahib towards the south, on the Nangal-Roopnagar-Chandigarh road. It is sacred to the Sikhs and they immerse the ashes of their dead at this place. It has a

long association with most of the Sikh Gurus. Guru Nanak Dev is said to have visited this place when it was little more than a wilderness, Guru Hargobind, the sixth Guru spent the last few years of his life here. There are several Gurudwara at this place like Gurudwara Charan

Kamal, Gurudwara Baba Gurditta, Tomb of Baba Buddan Shah, Gurudwara Bavangarh, Gurudwara Pata Puri and Gurudwara Shish Mahal.

### 2.5.6 Morinda

Morinda is situated on the state highway connecting Chandigarh and Ludhiana and also on Sirhind -Nangal Railway line. It is a a distance of about 25 KMs from the district headquarters and 30 km from Chandigarh.

Morinda is an old town which is believed to

trace its name from Mor Jats. With the lapse of time, it came to be known as Moran and then Morinda. It is also known as Baganwala (the place of Gardens), because of numerous gardens of mango trees in the area. Even though the mango growers have largely disappeared, many people of this area continue to call it Baganwala.

In the middle of the town centre is an ancient gumbad believed to be of the time of Aurangzeb. This is built of small bricks and has gates on all sides.

Gurudwara Shahid Ganj in Morinda was built in the memory of Baba Fateh Singh and Baba Zorawar Singh, the younger sons of Guru Gobind Singh.

First co-operative Sugar Mill was also set up at Morinda to consume the sugarcane, which is a major crop of the area.

### 2.5.7 Nangal

Situated at the feet of the Shiwalik Hills, Nangal is at a distance of 60 km from Roopnagar, the district headquarters. The City is surrounded by beautiful environment of hills, river and canals and is an important center for tourists visiting the district.

It is divided into two parts, Nangal Township and Naya Nangal. The town was named Nangal by acquiring land of three villages viz. Nangal Nikku, Hambewal and Dubheta. It gained importance with the starting of the construction of Bhakra Dam on Satluj river in November, 1955. It is flourishing township of tourist attraction due to the mighty multi purpose Bhakra Project which includes apart from Bhakra Dam, the Nangal Dam, Nangal Hydel Channel, Ganguwal and Kotla Power Houses.

Towards the north stands the beautiful township called Naya Nangal which serves mainly Fertilizer Complex of National Fertilizers Limited (NFL), a public sector undertaking of Government of India. The Nangal Fertilizer and Heavy Water Factory located hee, started production in 1961 and is the single largest consumer of electricity from the Bhakra Power House.

Overlooking the Nangal like, Gurudwara Vibhour Sahib presents a majestic view. This Gurudwara is situated at a distance of 5 km from Nangal.Guru Gobind Singh is said to have mediated at this place.

There is a Dharamshala known as Shri Balbahadur Mal Kuthiala Dharamshala situated on the bank of Satluj River, which provides free accommodation to the visitors. Inside it, there is a temple of Lakshmi Narain which is run by the Sanatan Dharam Sabha, Nangal Township. Suitable facilities have been provided in various rest houses for the boarding and lodging of visitors. Punjab Tourism Development Corporation runs a Tourist Bungalow known as Kabamba.

At a distance of 4 km from Nangal Township is a temple of Shiva, known as 'Shiv Ashram' situated on the outskirts of village Mojowal on the Nangal-Bhallan road. This Ashram was founded by Swami Giangiri who first lived in a small hut near the bank of river Satluj. There are a free Ayurvedic dispensary and a dental clinic in the Ashram. Fairs are held on Shivratri, Nirjale Ekadashi Vyas Puja every year.

# 2.6 <u>PLACES O F HISTORICAL ,RELIGIOUS AND TOURIST</u> <u>INTEREST</u>

### 2.6.1 Takhat Sri Keshgarh Sahib

The most important of the complex of shrines at Anandpur Sahib is Gurudwara Keshgarh Sahib, which stands on the place where the "Khalsa" was born. It is regarded as one of the five sacred "Takhats" or seats of Sikh religion. It is on the main Roopnagar-Nangal road and one has to walk up a cobbled path to reach the shrine, built on the hillock. Climbing up some steps, Darshani Deorhi has to be crossed first then comes the large open marbled quadrangle at the

end of which steps lead up to the central shrine. In the centre of the hall is a room displaying twelve weapons used by Guru Gobind Singh in battle. There is an imposing dome on the hall with a golden kalas on the top. A big serai of about 200 rooms is also attached.

It was here in 1699, on the Baisakhi day (13th April),

Tenth Master Guru Gobind Singh Ji created Khalsa by baptizing five beloved Sikhs known as "Panj Piaras". At the behest of the Guru, thousands of people had assembled on the hill where now Gurudwara Keshgarh Sahib stands. The Guru appeared before the congregation with a naked sword in his hand and told that his thirsty sword demanded the life of a volunteer. A

deep hush fell over the crowd. Ultimately, Daya Ram, a Khatri of Lahore came forward. The Guru took him to a tent and returned with his sword with blood. He asked for another head and Dharam Dass, a Jat from Delhi offered himself. Three more similar calls brought out Mohakam Chand, a washerman of Dwarka, Sahib Chand, a barber from Bidar and Himmat Rai, a water carrier from Jagan Nath Puri.

From the tent in which these five followers had been taken, Guru Gobind Singh brought out the five Sikhs dressed in new clothes, blue turbaned with loose long yellow shirts, a waist band round their waists, with sorts of Knicker-bockers worn as underwears and with swords dangling by their sides. It was an inspiring sight. The Guru told the congregation that these were his Five Beloved Sikhs (Panj Payaras), and he baptized them by offering them Amrit (the nectar of immortality) he had prepared by dissolving Sugar Bubbles (Patasa) in water sanctifying the sweetened water by stirring it with double edged sword (khanda) and reciting the holy verses. The Guru himself took the Amrit from the Panj Payaras, thus removing the distinction between himself and followers. On that day, Guru Gobind Rai became Guru Gobind Singh. The Panj Payaras were enjoined to embrace the five symbols of the new Sikh faith, Kes (unshorn hair), Kangha (comb), Kara (steel bracelet), Kachha (short drawer) and Kirpan (sword). The ceremony gave followers of Guru, a new identity which was to prepare the Sikhs for their struggle against the Mughal State and influence the future of the country.

### 2.6.2 Gurudwara Parivar Vichhora Sahib

Gurudwara Parivar Vichhora Sahib is situated adjacent to the canal near village

Nangal Sirsa, at a distance of about 14 Km from Roopnagar. It has a lofty flight of 84 steps leading upto the top. Guru Gobind Singh along with his family and followers came to this place leaving the Fort of Anandpur Sahib, He had not yet reached the bank of the Sirsa River, 15 Km to the east when he was

attacked by a strong contingent under Wazir Khan, the Governer of Sirhind. When the Guru was heavily engaged, another detachment of the Mughals delivered an assault on the first batch halting on the river bank. A fierce battle took place here in which most of Guru's followers lost their lives. It is the place where Guru was separated from his family and then preceded towards Kotla Nihang along with his two elder sons and 40 followers. The Guru's mother and his two younger sons were taken by Gangu, an old domestic servant of the family to his native village, Saheri near Morinda. Mata Sunderi and Mata Sahib Devi, the wives of the Guru were taken to Delhi in the guise of rustic women. A gurudwara called Parivar Vichhora Sahib marks the site where the family of the Guru was separated. The construction of the gurudwara was started in

1963 and completed in 1975. A big fair lasting for three days is held here annually in the month of December

### 2.6.3 Gurudwara Bhatta Sahib

Gurudwara Bhatta Sahib is situated in the village Kotla Nihang, at the outskirts of Roopnagar town. It was built in the memory of Guru Gobind Singh. After leaving Anandpur Sahib, the Guru pursued by the enemy reached Kotla Nihang and asked the Pathans there to give him shelter. The latter, jestingly pointed out to a lime-

kiln as the only fit place for him to stay. The story goes that the Guru led his horse straight to the kiln and on his approach, the fire miraculously went out. The Pathans hearing of this miracle invited the Guru to their house. The Guru gave them certain gifts (weapons) and left for Chamkaur Sahib the next day unknown to his pursuers. The Gurudwara was built at the site of the kiln by Baba Jiwan Singh in 1914.

#### 2.7 Major Development Events

In the end of the 19<sup>th</sup> century, in 1892 the most important development event in the history of Roopnagar town was digging of Sirhind Canal from Satluj river at Ropar headworks to Doraha (Malwa) .In addition to this, in 1925 Old Mandi site (Near Sub Jail Ropar) was also established. Both these events boosted the economic and physical development of the town.

Notified Area Committee upgraded to Municipal Council in 1948 and is known as Municipal Council . In 1950 Construction of Water Works (by bringing and serving the canal water) now known as old water works located near Trust office was also established.

As far as education is concerned, the first recognised D.A.V high school was established in the year-1923 to serve the people of the town. The detail of events of development milestones in Roopnagar are listed in table below:

Table 1: Detail of Development Milestones in Roopnagar

| Sr. No. | Year | Events  |
|---------|------|---|
| 1       | 1833 | Treating between Maharaja Ranjit Singh & Mr. William      |
|         |      | Betting (Governor Punjab) at the edge of Satluj River.    |
| 2       | 1892 | Laying of Sirhind Canal from Satluj river( at Ropar       |
|         |      | headworks to Dorha(Malwa))                                |
| 3       | 1902 | Khalsa High School.                                       |
| 4       | 1923 | D.A.V. High School.                                       |
| 5       | 1925 | Old Mandi Site(Near Sub Jail Ropar)                       |
| 6       | 1927 | First Railway line Nangal –Ropar Sirhind City.            |
| 7       | 1948 | Gandhi Public School.                                     |
| 8       | 1948 | Municipal Council Roopnagar(Class-II)                     |
| 9       | 1948 | Old Tehsil Complex.                                       |
| 10      | 1950 | Construction of water works (by bringing & serving canal  |
|         |      | water)now known as old water works located near Trust     |
|         |      | Office.   |
| 11      | 1951 | Govt. College Roopnagar.                                  |
| 12      | 1954 | Construction of Bridge on Satluj river at Roopnagar city. |
| 13      | 1960 | First Cinema-Kalyan Takki.                                |
| 14      | 1967 | Roopnagar was declared as District Headquarter.           |
| 15      | 1970 | I.T.I Institute Roopnagar.                                |
| 16      | 1983 | Laying of sewerage system started                         |
| 17      | 1984 | Mini Secretariat Constructed.                             |
| 18      | 1985 | New Grain Market Roopnagar.                               |
| 19      | 1992 | New Water works in Giani Zail Singh Nagar.                |
| 20      | 1994 | Girls Polytechnic College, Roopnagar.                     |
| 21      | 2009 | Indian Institute Technology College, Roopnagar.           |

# 2.8 Institutional and Planning Events

Besides the growth of trade and commerce, the industrial sector also started concentrating and contributing towards the growth of the town. The establishments of D.A.V High School in 1923 and Govt. College

Roopnagar in 1951 were the educational institutions which played a dominant role in the region. The detail of institutional and planning events is given in table beow:

| Sr. No. | Year | Events   |
|---------|------|--|
| 1       | 1902 | Khalsa High School.                                      |
| 2       | 1923 | D.A.V High School.                                       |
| 3       | 1948 | Gandhi Public School.                                    |
| 4       | 1951 | Govt. College Roopnagar.                                 |
| 5       | 1958 | Fisrt Town Planning Scheme.                              |
| 6       | 1976 | First Commercial Development Scheme.                     |
| 7       | 1984 | Mini Secretariat Constructed.                            |
| 8       | 1985 | New Grain Market Roopnagar.                              |
| 9       | 1997 | Lying down of Ropar bye-pass(incomplete)                 |
| 10      | 2001 | First approved Private Colony Sun- City.                 |
| 11      | 2008 | Notification Local Planning Area, Roopnagar u/s 56(1) of |
|         |      | PRTPD(Amendment) Act,2006.                               |

Table 2: Detail of Institutional and Planning Events in Roopnagar.

Keeping in view the growth of Roopnagar city and in order to check unplanned development, the development scheme was prepared by Improvement Trust in 1975 under Punjab Town Improvement Act, 1922 In order to ensure and regulate the development of Roopnagar city in a planned way the enactment of Punjab Regional and Town Planning and Development (Amendment) Act, 2006, the Government of Punjab has decided to prepare Master Plans for a number of cities and towns which also includes Roopnagar city. LPA, Roopnagar has been notified under section 56 (1) of Punjab Regional and Town Planning & Development (Amendment) Act, 2006 vide notification no 12/71/2006-4HG1/3224, dated 9/5/08. and amended Notification No. 12/71/06-4 HGI/750 dated 27/2/09.

#### 2.9 Administrative Milestones

Roopnagar city is one of the earliest declared urban settlements of Punjab. It was notified as Notified Area Committee in 1948 and then upgraded to Municipal Council Class-II in 1948. It was made District headquarters in 1967. In order to develop the city in a planned way, Improvement Trust, Roopnagar was established in 1975. The details of Administrative milestones of Roopnagar city are given in table below:-

| Sr. No. | Year | Milestones   |
|---------|------|--|
| 1       | 1948 | Municipal Council Roopnagar Class-II                     |
| 2       | 1967 | District Headquarter                                     |
| 3       | 1975 | Improvement Trust, Roopnagar                             |
| 4       | 2008 | Notification Local Planning Area, Roopnagar u/s 56(1) of |
|         |      | PRTPD (Amendment) Act, 2006.                             |

**Table 3: Details of Administrative Milestones of Roopnagar** 

### 2.10 Legal Framework for Preparation & Implementation of

#### Master Plan

The principal legislation governing regional and town Planning is the "Punjab Regional and Town Planning and Development Act, 1995 (PRTPD)" which was enacted in the year 1995 (Punjab Act No.11 of 1995) and amended in the year 2006 and is now known as "The Punjab Regional and Town Planning and Development (Amendment) Act 2006" (Punjab Act No 11 of 2006). This is an act to make provision for better planning and regulating the development and use of land in planning areas delineated for that purpose, for preparation of Regional Plans and Master Plans and implementation thereof, for the constitution of a Regional and Town Planning and Development Board, for guiding and directing the planning and development Authority, Special Urban Planning and Development Authorities and New Town Planning and Development Authorities, for the effective and planned development of planning areas and for undertaking urban development and housing programs and schemes for establishing new towns and for matters connected therewith or incidental there to.

Prior to this enactment of the Act the town planning activity within urban areas was being governed by different legislations such as The Town Improvement Act 1922, The Punjab Municipal Act 1911, The Punjab Municipal Corporation Act 1976, The Punjab Urban Estates (Development and Regulation) Act 1964 etc and for areas falling outside municipal limits in the periphery of urban centers, there was 'The Punjab Scheduled Roads And Controlled Areas Restriction of Unregulated Development Act 1963(Now repealed) but no comprehensive legislation was available for the overall control and development at local and regional level.

# 2.10.1 <u>The Punjab Regional and Town Planning and Development</u> (Amendment) Act 2006 (Main Provisions of the Law)

This act provides the framework for preparing Master Plans and Regional Plans and provides for the manner in which the use of land in the area of a planning authority is regulated. The act also prescribes specific time period for various steps in the plan preparation process.

The act intends to achieve the following main objectives:

- (a) To consolidate, with suitable modifications, in one place laws dealing with the different aspects of urban development.
- (b) To set up a high powered Board to advise the State Government and to guide and direct planning and development agencies, with respect to matters pertaining to the planning, development and use of urban and rural land.
- (c) To set up a State level Urban Planning and Development Authority and to provide for the setting up of a Special Urban Planning and Development Authorities and New Town Planning and Development Authorities to promote and secure better planning and development of different regions, areas and cities.
- (d) To create a legal and administrative set up for the preparation and enforcement of Master Plans for regions, areas and for existing and new cities.
- (e) To make the whole programme of urban development mainly a self sustaining and self paying process.
- (f) To interlink land development and house construction permitting full exploitation of the urban land resource to provide a boost to the programme of house construction, especially the Economically Weaker Sections of the Society.

(g) To provide a legal, administrative and financial framework for the preparation and execution of Town Development Schemes aimed at filling the gaps in the required civil infrastructure and securing the renewal and redevelopment of congested and decayed areas in the existing towns.

The main provisions of the Act related to preparation of Master Plan are described below:

- (a) Section 56(1) enables declaration of Local Planning Areas (LPA) in the official gazette for preparing Master Plan. Once an area has been declared under section-56 (1), no person can institute or change the use of land for any purpose or carry out any development in respect of any land without the previous permission of competent authority until the Master Plan comes into operation. However, this prohibition does not apply to any area comprised in abadi deh of any village falling inside its lal lakir or phirni.
- (b) Section 57 provides for the state Government to designate Planning Agency for area declared as Local Planning Area.
- (c) Section 58 defines scope of Planning agency and provides that;
  - The designated Planning Agency will work under the overall directions and control of the State Government.
  - The state Government may assign any or all of the following functions to the Designated Planning Agency, namely to
  - Carry out survey of the regional planning area, Local Planning Area, or a site for new town, as the case may be, and prepare reports on the surveys so carried out;
  - Prepare an existing land use map and such other maps as may be necessary for the purpose of preparing regional plan and outline master plan, a new town development plan or a comprehensive master plan, as the case may be;
  - Prepare a regional plan, an outline master plan, a new town development plan or a comprehensive master plan.
  - Subject to and in accordance with the directions of the Govt., a designated planning agency shall exercise all such powers as may be necessary or expedient for the purposes of carrying out its functions under this act and also perform any other functions which are supplemental, incidental or consequential to any of the functions specified in sub section (2) or as may be prescribed.

- (d) Section 59 deals with the preparation of present land use map and fixes six months time for this purpose, which may be extended by the State Govt. from time to time.
- (e) Section 70(1) states that the planning agency shall not later than one year after declaration of planning area and after the designation of that agency for that area shall prepare and submit to the state government a master plan for its approval. The Master Plan so prepared shall
  - Indicate broadly the manner in which the land in the area should be used.
  - Allocate areas or zones of land for use for different purposes.
  - Indicate, define and provide the existing and proposed highways, roads, major streets and other lines of communication.
  - Indicate areas covered under heritage site and the manner in which protection, preservation and conservation of such site including its regulation and control of development, which is either affecting the heritage site or its vicinity, shall be carried out.
  - Include regulations to regulate within each zone the location, height, number of storeys and size of buildings and other structures, open spaces and the use of buildings, structures and land.
- (f) Section 70 (3) has the provision for the state government to direct the designated planning agency to publish the existing land use plan and master plan and the information regarding places where copies of the same may be inspected by the public for inviting objections in writing with respect to existing land use plan and master plan within a period of 30 days from the date of publication.
- (g) Under Section 70(4), the state government after considering the objections and in consultation with the Board may direct the designated planning agency to modify the master plan or approve it as such
- (h) Under Section 70 (5), the Designated Planning Agency after approval of the state government shall publish the final master plan in the official gazette after carrying out the modification if any under intimation to the state government within a period of 30 days from the date of according the approval by the state government.

 According to Section 75, the Master Plan comes into operation from the date of publication, referred to in sub section 5 of Section 70.

Chapter XI of the Act also provides for "Control of Development and Use of Land in the area where the Master Plan is in operation".

Chapter XII, Section 91 of the Act deals with the preparation of Town Development Schemes that can play a significant role in the implementation of Master Plan by way of planned development and through making land available for the open spaces, recreation, education and health services, transport and communication network, water supply, sewerage, sewage disposal and other public utilities including electricity and gas etc

Chapter XIV deals with "Control and Development along Scheduled Roads"

In addition to the The Punjab Regional and Town Planning and Development (Amendment) Act 2006 there are a few acts that have no direct bearing on preparation of Master Plan but have a definite role to play in the implementation of the proposals of the Master Plan. These are briefly described below;

(A) Punjab Apartment And Property Regulation Act, 1995

The Punjab Apartment and Property Regulation Act, 1995 has been enacted with a view to regulate the promotion of the construction, transfer and management of apartments on ownership basis, to regulate colonies and property transactions and to provide for registration of promoters and estate agents and enforcement of obligations on promoters and estate agents and for matters connected therewith or incidental thereto.

- It provides planned development by checking, controlling and regulating the activities of the private developers.
- It makes funds available for planned development.
- It provides land for social and physical infrastructure through the mechanism of planned development.

- It also has the provision to make social housing available at low prices for Economically Weaker Section of the society.
- (B) Punjab Town Improvement Act, 1922
- The Punjab Town Improvement Act,1922 plays a significant role for the implementation of Master Plans in the following manner:
- It helps to provide planned development through the mechanism of Development Schemes.
- It makes land available for the development of social and physical infrastructure like schools, health, parks and playgrounds, and planned road network etc.

It also provides social housing to Economical Weaker Sections and thus helps to check the growth of slums.

The stages of preparation of Master Plan are shown in flowchart at figure below in a more elaborated way

## Figure 1 : Stages of Master Plan Preparation

# 2.11 LOCAL PLANNING AREA ROOPNAGAR

In view of the strategic location and importance of Roopnagar, a proposal of Local Planning Area, Roopnagar was prepared for the purpose of preparation of master plan for the planned development of this town. While preparing the proposal, the following related matters mentioned in Rule 22 of the Punjab Regional and Town Planning and Development (General) Rules, 1995 were considered:-

- 1. Village boundaries for easy demarcation of Local Planning Area on the ground.
- 2. Geographic features for the disposal of rain water from rivulets;
- 3. Accessibility to the area from Chandigarh-Nawan Shahar road;
- 4. Industrialization due to the impact of Roopnagar;
- 5. Future economic & commercial activities of the area ;
- 6. Urbanization of the area during the next 20 years ; and
- 7. Transfer of economic activities of Chandigarh to Roopnagar after development of this urban centre.

#### **CHAPTER III**

### 3.1 <u>POPULATION, HOUSING, ECONOMY AND EMPLOYMENT</u>

#### 3.1.1 <u>Population Growth and Characteristics</u>

Demographic profile of the area in terms of the population, growth rate, population density, literacy rate etc. helps in determining the social as well as the economic character of the area. The study has been done decade wise which helps in bringing out the trends of the growth rate, literacy level, sex ratio etc. of the LPA, Roopnagar & Roopnagar city. The study of population growth and characteristics plays an important role in defining the urban limits of a town/city. The following studies related to population growth and characteristics for Roopnagar city & LPA, Roopnagar have been conducted to know characteristics of LPA, Roopnagar & Roopnagar city.

### 3.2 **<u>POPULATION GROWTH</u>**

### 3.2.1 Local Planning Area, Roopnagar:

Local Planning Area, Roopnagar includes only one urban settlement i.e. Roopnagar and 129 villages. Local Planning Area experienced growth rate of 32.07% and 22.23% during the year 1981 - 1991 and 1991 - 2001 respectively. Thus showing a decline in the population growth rate during the last decade which might be due to the weakening of the economic base of the city. Roopnagar is the only one urban settlement of its LPA, with population of 49,159 persons in 2001. The growth trend of population of Punjab State and LPA, Roopnagar is given in table below:

|                   | POPULATION |        |        | <b>GROWTH RATE IN %</b> |           |
|-------------------|------------|--------|--------|-------------------------|-----------|
|                   | 1981       | 1991   | 2001   | 1981-91                 | 1991-2001 |
| PUNJAB STATE *    |            |        |        |                         |           |
| TOTAL             | 16.79      | 20.28  | 24.36  | 20.79                   | 20.12     |
| URBAN             | 4.65       | 5.99   | 8.25   | 28.82                   | 37.73     |
| RURAL             | 12.14      | 14.29  | 16.11  | 17.71                   | 12.74     |
| * POPULATION IN M | ILLLIONS   |        |        |                         |           |
| LPA, ROOPNAGAR    |            |        |        |                         |           |
| TOTAL             | 84211      | 111222 | 135947 | 32.07                   | 22.23     |
| URBAN             | 25165      | 37996  | 49159  | 50.91                   | 29.38     |
| RURAL             | 59046      | 73226  | 86788  | 24.01                   | 18.52     |

Table 4: Population Growth Rate of Punjab State and LPA, Roopnagar: 1981-2001

Source: Census of India, Punjab 1981, 1991, 2001,

Table above depicts that growth rate of total population of LPA, Roopnagar has decreased from 32.07 % during 1981- 91 to 22.23 % during 1991- 2001 decade. Similarly the growth rate of urban population i.e. of Roopnagar city of LPA, Roopnagar has also decreased from 50.91% to 29.38% and also low when compared to urban growth rate of Punjab which is about 37.73% during the last decade. But in case of rural population, the growth rate of rural population of LPA, Roopnagar is about 18.52% during 1991-2001 which is on the higher side than that of Punjab state which is about 12.74%.

Besides above, growth trends have also been analyzed in terms of share of population of LPA, Roopnagar to the State population. As far as the share of total population of

LPA, Roopnagar to total population of state is concerned it has increased from 0.50% in 1981 to 0.54 % in 1991and then increased to 0.56% in 2001. Also the share of urban population of LPA, Roopnagar showed an increasing trend from 0.54% in 1981 to 0.63% in 1991 and has declined to 0.59% in 2001 whereas the share of rural population is constantly increasing from 0.48% in 1981 to 0.54% in 2001 during this period as shown in table below:

| YEAR  | 1981  | 1991  | 2001  |
|-------|-------|-------|-------|
| TOTAL | 0.50% | 0.54% | 0.56% |
| URBAN | 0.54% | 0.63% | 0.59% |
| RURAL | 0.48% | 0.51% | 0.54% |

 Table 5:
 Share of LPA, Roopnagar in Punjab state

Source: Census of India, Punjab 1981, 1991, 2001

### 3.3 <u>Roopnagar City</u>

As already stated that Roopnagar (Distt. Headquarter) is the only urban settlement of LPA, Roopnagar. Its share in the total population of Punjab has increased from the year 1981 to 2001. Share of population of Roopnagar city to the total urban population of the state was 0.59% in the year 2001. Roopnagar city recorded a lowest growth rate of 9.68% during 1911-1921 and had a population of 7606 persons only in the year 1921. However, the city registered high growth rates of 52.94% and 50.98% during the decades of 1971-81 and 1981-91 respectively .Roopnagar City registered a negative growth rate of .054% in 1951-61decade which can be attributed to out migration from the city .During the years 1971-81 & 1981-91 some important projects like DCM, SWARAJ MAZADA, RANBAXY and THERMAL POWER PLANT etc. came to city which contributed to the growth rate of city population. The detail of population growth of Roopnagar city from 1901 to 2001 is given in table below:

| Years | Population Of Roopnagar City | Decadal Growth Rate in(%) |
|-------|------------------------------|---------------------------|
| 1901  | 8888                         | -                         |
| 1911  | 6935                         | -21.97                    |
| 1921  | 7606                         | +9.68                     |
| 1931  | 8764                         | +15.22                    |
| 1941  | 10385                        | +18.50                    |
| 1951  | 14213                        | +36.86                    |
| 1961  | 14136                        | -0.54                     |
| 1971  | 16454                        | +16.39                    |
| 1981  | 25165                        | +52.94                    |
| 1991  | 37996                        | +50.98                    |
| 2001  | 49159                        | +29.38                    |

Figure 3: Growth of Population of Roopnagar City: 1901-2001

The growth trends of urban population in Punjab and that of Roopnagar city are given in table below:

| Years | Urban<br>Population of<br>Punjab (Persons) | Decadal Growth<br>Rate of Urban<br>Population of<br>Punjab (in<br>Percent) | Population of<br>Roopnagar<br>M.C.(Persons) | Decadal Growth<br>Rate of<br>Population of<br>Roopnagar City<br>(in Percent) |
|-------|--|--|---|--|
| 1971  | 3216179                                    | -  | 16454                                       | -  |
| 1981  | 4647757                                    | 44.51  | 25165                                       | 52.94  |
| 1991  | 6038717                                    | 29.93  | 37996                                       | 50.98  |
| 2001  | 8262511                                    | 36.82  | 49159                                       | 29.38  |

Table 7: Growth trends - Urban Population in Punjab and Roopnagar 1971-2001

Source: Census of India, Punjab, 1971 to 2001

The study of above table shows that growth rate of Roopnagar city was 52.94% and 50.98% during 1971-81 and 1981-91 decade which was higher than that of Punjab. But during the 1991- 2001 decade, the growth rates of Roopnagar city were lower than that of Punjab i.e. 36.82%. The decreasing trend in growth rate of Roopnagar city is perhaps due to closure of many industrial units.

# 3.4 **<u>POPULATION DENSITY</u>**

The gross population density of Roopnagar city has constantly increased during the period of 1971-1991, from 6.58 persons per hectare in 1971 to 10.07 persons per hectare in 1981, 15.20 persons per hectare in 1991, 19.66 persons per hectare in 2001. Therefore the analysis of population density is done keeping this area in view.

| Year | Population<br>(Persons) | City Area (In<br>Hectares) | Density in Persons/hectare |
|------|-------------------------|----------------------------|----------------------------|
| 1971 | 16454                   | 2500                       | 6.58                       |
| 1981 | 25165                   | 2500                       | 10.07                      |
| 1991 | 37996                   | 2500                       | 15.20                      |
| 2001 | 49159                   | 2500                       | 19.66                      |

| 15       | Ward No.15      | 2599  | 162           | 16.04        |  |  |  |
| 16       | Ward No.16      | 2763  | 186           | 14.85        |  |  |  |
| 17       | Ward No.17      | 3816  | 177           | 21.56        |  |  |  |
| Total    |                 | 49159   | 2023 [819     |              |  |  |  |
|          |                 |   | Hect.]        |              |  |  |  |

The density of population within the municipal limits is not uniform over the city. It varies from ward to ward as given in the table below:-

Inter census comparison of ward wise density is however not possible as ward boundaries and number of wards have been changing over the years. The density gradient as per 2001 census shows that ward no. 7,9,10 and 12 are having a gross density of more than 30 persons per acre with the distinction of highest density of 84 persons per acre in ward no.4 and the lowest only 14.85 persons per acre in ward no. 16.

### 3.5 <u>Age structure</u>

The age structure or age distribution is given by age groups. The age groups of below 19 is having 33.82% of city population and in age group of 20-39 category, population stands for 22.93 %. About 25.11 % of population falls in age group of 40-59 and whereas only 15.53 % of population lies in the group of more than 60 years. The breakup of different age group is given in table below:

 Table 10:
 Age structure of Roopnagar city for the year 2001

Source: Census of India, Punjab, 1981, 1991, 2001

### 3.6 Sex Ratio

According to 1981 census, there were 845 females for every 1000 males in LPA, Roopnagar. In 1991, the sex ratio improved to 854 which showed a rising trend in sex ratio but in 2001 the sex ratio again improved to 860. In case of Roopnagar city also, the sex ratio increased from 869 in 1981 to 879 in 1991 and then increased to 886 in 2001. The sex ratio of Punjab State 2001 was 876, which is on lower side as compared to Roopnagar city.

#### The detail of sex ratio is given in table below:

### 3.7 Caste composition

The total Scheduled Caste population in LPA, Roopnagar is 35949 persons which is 26.44 % of the total population as per 2001 census. SC population of LPA, Roopnagar

is decreased from 26.88% in 1981 to 26.44% in 2001. The percentage of SC population of Roopnagar city decreased from 17.57% in 1981 to 17.53 % in 2001. The average SC population in Punjab State is 28.85%, which shows that percentage of SC population in LPA, Roopnagar is less than that of Punjab. The detail of scheduled caste population of LPA, Roopnagar and Roopnagar city from 1981 to 2001 is given in table below:

 Table 12: Schedule caste population & percentage of S.C population to total population

 Table 13:
 Literacy rate of LPA, Roopnagar 1981-2001

Source: Census of India, Punjab 1981, 1991, 2001

Figure 5: Literacy Rate of LPA, Roopnagar 1981 – 2001

The study of below table shows that literacy rate in case of Roopnagar city is also on the increasing trend. It was 60.59% in 1981 whereas it increased to 73.34% in 2001. The literacy rate of females was 41.39% in 1981 and it increased to 45.11% in 2001 whereas in case of male literacy it has decreased from 58.62% to 54.89% in 2001.

Literacy rate of LPA, Roopnagar is lower as compared to the Punjab state i.e. 70% in 2001. It means there is a still need to make aware people about the education, and there is need to strengthen the existing education system by way of opening the new educational institutions at different levels in LPA, are taking into account the requirements of the today's society.

| Sr.<br>No. | Year | Total<br>Population | Total<br>literates |       |        | Males Literacy |        | s Literacy |

#### **3.9 ECONOMIC BASE**

For ascertaining the economic base of District Roopnagar a study has been carried out with regard to the non-workers and workers engaged in different activities. The study is based on census data which can be relied upon for assessment of workforce. The study points out that 2001 census listed out 15350 workers and 33809 non-workers out of population of 49159 persons in Roopnagar city. They constituted 31.22% and 68.77% of the population, respectively.

#### 3.9.1 Work force Participation & Employment

Table below depicts that the percentage of workers is increasing both in LPA, Roopnagar and Roopnagar city during the last decades. Increase in workers participation means new opportunities in trade & commerce & tertiary sector. In the case of LPA, Roopnagar the percentage of workers to the total population has been marginally increased from 29.67% in 1981 to 29.98% in 1991 and then again increased to 36.00% in 2001. However, the workforce participation rate has increased from 30.64% in 1981 to 31.22 % in 2001 in case of Roopnagar city. There are 64.00% non-workers in LPA, Roopnagar and 68.78 % non-workers in Roopnagar city as per census 2001. The detail of workers and non-workers is given in table below:

# 3.10 Housing and Slums

#### 3.10.1 <u>General</u>

Housing is one of the basic human needs and ranks after food and clothing in terms of priority. Housing constitutes one of the most important parts of the social environment where an individual is nurtured, grows and matures as a human being, part of the society and as a citizen. Housing, in addition to making contribution to the quality of living also plays a significant role in improving the national economy and generation of employment. It does not provide merely a shelter but gives an identity to the human being besides making him better human being. Poor quality of housing or absence of appropriate shelter has considerable impact on the economy and productivity of human beings besides health and social environment. Housing has been considered to have critical role in maintaining the social health and stability and in ensuring the people a decent quality of life. Accordingly, housing has been placed high on the agenda of any national government committed to the cause of promoting human welfare. Considering the role and importance of housing in the national economy, productivity, industrial growth, employment and quality of life, a number of policies dedicated to creating affordable housing have been framed at the national level. The agenda of these policies have been focused on the ultimate goal of providing affordable housing for all.

As per Central Statistical Organization (CSO) estimate, the Housing Sector contributed 4.5% to India's Gross Domestic Product (GDP) in 2003-04 at current prices. The contribution of housing in urban areas to the GDP in 2003-04 was 3.13%. Further, the spotlight is focused on the fact that 16% of the Indian work force is engaged in Construction and Transport

Sectors. It is estimated that overall employment generation in the economy on account of additional investment in the Construction/Housing Sectors is eight times the direct employment (IIM Ahmedabad: 2005). In view of the substantial use of cement, steel, marble/ceramic tiles, electrical wiring, PVC pipes and various types of fittings, construction activity has a multiplier effect on industrial demand for these items.

Housing is not merely confined to the four-walls which make a house but also all supporting infrastructure which is required to sustain the human beings in terms of physical and social infrastructure. Accordingly, National Housing Urban Policy laid emphasis not only on providing affordable shelter but also creation of appropriate quantity and quality of essential services etc.

### 3.10.2 Growth of Housing in Roopnagar.

Housing is an activity, which is mainly driven by individuals to provide themselves with an appropriate shelter. With the rapid increase in population, number of houses has also recorded an increase. Besides individuals, different agencies like Improvement Trust, Roopnagar and Municipal council has also contributed to some extent to household stock in the Roopnagar city. Besides these, private colonizers have also made their share as plotted development by developing some colonies unauthorizedly and authorizedly in the city. In case of major cities of Punjab, various agencies like PUDA, Improvement Trust have framed many schemes of plotted development & multistorey houses. Although Roopnagar Improvement Trust has been contributed to the housing sector of the city. Eight development schemes have been executed by Improvement Trust Roopnagar so far. Out of these, four are of residential cum commercial nature and four are purely commercial schemes covering an area of approx. 183 acres. The detail of these schemes is given in the table below:

| Sr. | Development Scheme        | Location               | Area        | Remarks          |
|-----|---------------------------|------------------------|-------------|------------------|
| No. |                           |                        | (in acres ) |                  |

#### 4.2.1 Residential

It is very much clear from table that the residential use has a larger share of city area. Out of total Municipal area of 964.94 hectares about 207.671 hectares 21.52 % of area is under residential use which includes both planned and unplanned development. The gross density of the town is 19.66 persons per hectare. As far as planned residential development is concerned there are 15 T.P Schemes and 8 Development Schemes of Improvement Trust, Roopnagar, Four commercial cum residential development schemes and 4 commercial schemes under Punjab Apartment and Property Regulation Act 1995'.

#### 4.2.2 Commercial

The commercial use is the most important use of the urban areas. It may have lesser share in area but plays an important role in city character. In case of Roopnagar city the total area covered under commercial use is 5.54% of the total M.C area. The main commercial center in Roopnagar City which acts as CBD of the city is known as Old Bazar of the old city. The commercial areas of the city lack adequate parking and other public amenities. The commercial area of the city is in the form of semi-organized bazars along streets and roads. Apart from this there are informal bazars in the form of temporary shops like Rehri walas, farhi walas and kiosks located in the existing commercial areas and near the old bus stand, railway station, grain market, and near other important economic activities. There are more than 250 numbers of rehris / informal shops existing in the various parts of the city. These activities are not of permanent nature and are using the roads therefore areas covered under this use are not shown separately.

The Wholesale grain market covering an area of about 23.844 hectares is located on Roopnagar - Kurali road near Bhatha Sahib Gurudwara. There is no planned site marked for other wholesale trades like timber, iron market etc.

#### 4.2.3 <u>Industrial</u>

As Table depicts that the total area under industrial use is 0.376 hectares which is 0.038% of the total municipal area. The city of Roopnagar has medium and large scale industrial units like Cotton ginning Mills, Oil extraction mills and other agro based industries etc along with small scale industrial units dealing with products like manufacturing of utensils, farm implements, kin now polishing, cotton ginning etc.

#### 4.2.4 <u>Recreational</u>

The total area under recreational use is 26.623 hectares which is 2.76 % of the total municipal area. In Roopnagar one city level park known as Maharaja Ranjit Singh Nagar Park is located near the Mini Secretariat and other parks near the Zail Singh Nagar , Aman Nagar and near I.T.Office etc. Recreational aspect is also covered in detail in part of social infrastructure .

#### 4.2.5 <u>Agricultural/Rural</u>

There are some chunks of land falling within municipal limits which are still being used for agricultural purposes. The areas on the western side between the existing developed area and the proposed by pass are largely under agriculture and orchards. 423.39 hectares are under agricultural use which is 43.88% of total area. Out of this category about 75.909 hectares of land is under Plant, Fruit Nursery, Orchard and 24.972 hectares of land is under canal and distributory system.

#### 4.2.6 Traffic & Transportation

The total area under traffic and transportation is 114.453 hectares which is 11.86 % of the total M.C area, which is low as compared to norms and standards. The major problems related to this aspect are missing road hierarchy, lack of parking places, traffic bottlenecks, encroachment of roads, lack of traffic signals etc. The detailed study of traffic & transportation is also covered in the part under Existing Road and Rail network of Physical infrastructure. However, table depicts that out of this use major share i.e 101.525 hectares of total municipal

area is covered under main roads followed by railways which cover an area of 1.070 hectares The details of existing road network and other uses relating to traffic transportation are shown in Existing Land Use Plan, Roopnagar Drg No. DDTP(R)8/2010 dated 15. 8.2010.

#### 4.3 Existing Road Network

NH-21 and SH-24 pass through the city. An alternative road 60mt wide has been proposed for which the land has been acquired, this road takes off from the National Highway in front of Police line between Transport Nagar and Power Colony. This bye pass will be connecting the National Highway to I.I.T. Roopnagar and further will merge in SH-24 (Roopnagar-Nawashahar) near DCM Factory.

There is one National Highway i.e. N.H. 21, coming from Chandigarh and diverting to Manali. Besides this, there are other 7 main roads as detailed in table below.

The work of construction of National Highway within the LPA Roopnagar is under construction and after its completion there will be a Central median for smooth flow of Traffic . The detail of widths of Right of way, carriage way and length of major roads falling within M.C. limits and outside M.C. limits in LPA, Roopnagar are given in table below:

| Table 23: Detail of Width of Right of Way, Carriage way and Length |       |         |        |      |        |     |         |      |        |    |      |

Source: Field survey 2009

The existence of main roads in LPA, Roopnagar shows that this area is well served by the regional roads, which provide a high level of connectivity with other parts of the State. The length of Major roads is 76.5 km within the LPA Roopnagar boundaries out of which about 15 Kilometers fall within the limits of Municipal Council of Roopnagar. There is very good network of rural roads in LPA, Roopnagar as well.

# 4.4 Existing Road Intersections

While examining the road network of the city a total number of 15 road intersections have been identified within the limits of Municipal Council, which remain busy throughout the day. These road intersections are listed in the table below:

| Sr. | Name of Junction   | Type of Junction   |
|-----|--|--------------------|
| No. |  | U L                |
| 1   | Chandigarh-Manali Road (NH-21) with<br>Roopnagar –Hoshiarpur road (SH-24)                              | Y-Junction         |

Table 24: Detail of Road Intersections in Roopnagar City

Source: Field survey 2009

The table above shows that out of 15 road intersections, 9 intersections are following in T-junctions, 4 are in Y- Junctions, 1 is in X- Junction and 1 is in H- Junction category .

#### 4.5 <u>Utilities & Services</u>

Utilities such as Water Works, Electric Grid Station, (E.G.S) Sewerage Disposal Works, Solid Waste Dumping site and communication etc. cover an area of about 10.012 hectares which is only 1.04% of total municipal area. Some of the utilities like E.G.S. and Communication are evenly distributed in the city as it is clear from Existing Land use Plan LPA, Roopnagar whereas disposal works and Solid waste site are located on the western side of the city along Bela Chowk to Academy road.

#### 4.5.1 Government and Semi-Govt

This use comprises the area under Govt/Semi Govt. offices and Govt. land. The total area covered under this use is 75.222 hectares which is 7.79% of the total M.C area. The existing Govt. offices are located in the Distt. Administrative Complex apart from this various other govt. offices are housed in govt. buildings which are scattered within the city.

#### 4.5.2 Public & Semi-Public

This Use comprises the areas covered under Education, Health, Socio-Cultural, cremation grounds etc. The total area covered by this use is about 43.513 hectares which is 4.51% of total municipal area. The most of public and semi-public uses are concentrated in the central part of the city whereas few uses of this category are also seen in the outer parts of the city.

# CHAPTER-V

# 5. <u>Existing Infrastructure</u>

#### 5.1 <u>Physical Infrastructure</u>

#### 5.1.1 Public Utility and Services

At present the water treatment plant of 1.4mgd in an area of 1.75 acres is located in Giani Zail Singh Nagar . It supplies water to the old city . At present there are 8 nos.of OHSR'S in various parts of the city in order to maintain the required water head. In order to meet the water requirement of the city, the water is lifted from Nangal Hydel Channel and treated in the various treatment plants. In order to cater for water requirement of the newly developed areas near the old city four water works have been commissioned .The newly developed colonies have their own water supply arrangements and are self sufficient as far as water requirement is concerned.

#### 5.1.2 <u>Distribution System</u>

As per data supplied by water supply and sanitation deptt., there are 17 water supply and sewerage schemes in various parts of the city and the total length of water supply lines laid in the city is 22352 mts and the length of sewerage lines is 15628 mts. In addition to this the length of water supply installed in various govt. institutions is 20101 mts. and the length of sewer lines installed in these govt. owned institutions is 16025 mts.

#### 5.1.3 Solid Waste Management

The sewerage treatment plant which caters for the treatment of sewerage water of the entire city is located in Shri Har Gobind Nagar. As far as solid waste management is concerned, the Municipal Council has been using a plot of 1.5acres in village Katli for dumping the solid waste.

#### 5.1.4 <u>Surface Water</u>

During rainy days, there are several pockets which are low lying and are flooded due to excessive rains. The low lying areas in Roopnagar are located in villages namely Bada Phool, Nanowal, Rattanpur, Chupki, Khizarpur, Tapprian Ramgarh, Boothgarh, Bada Surtapur, Gharispur and the low lying areas of Distt. Nawan Shahar are Asron and Arazi Dariya Bramda Rail.

#### 5.2 <u>Social Infrastructure</u>

#### 5.2.1 Educational Facilities

Educational facilities have a formative effect on the mind, character or physical ability of an individual. These facilities include the institutions by which society, through schools, colleges, universities and other institutions accumulates knowledge, values and skills. These facilities help in pacing the economic development and employment of the urban areas and its hinterland. Roopnagar is the educational hub in its Local Planning Area, which serves not only the Roopnagar city but also its surrounding villages. There are quite a large number of institutes in Roopnagar city and LPA, Roopnagar which cater to the educational requirement of Roopnagar city as well as its surrounding villages. Theses institutes include Degree Colleges, Polytehchnic College, Nursing Colleges, Rayat and Bahra Institutes, I.T.Is, I.I.T, Technical institutes affiliated to Punjab Technical University and other institutions. Govt. College of Roopnagar is the most oldest and famous institute of the city situated at Roopnagar. A B.Ed degree college also operates from its premises. In addition to these there is one Polytechnic college Roopnagar, One Management College, two Computer centres and three schools (Khalsa High School, D.A.V.High School, Gandhi Public School, located in different parts of the city which are fulfilling both technical and non technical educational requirements of Roopnagar city and LPA Roopnagar. These institutes are adequate as compared to the Norms and Standard prescribed in the UDPFI guidelines.

Besides the higher level of educational institutions which are catering to the needs in the fields of higher education, Roopnagar city and its Local Planning Area has number of schools at primary & secondary level which imparts education at school level. Presently there are 102 primary and elementary schools and 27 high/higher secondary schools functioning in the rest of LPA, Roopnagar, whereas 20 primary and elementary and 15 High/ Higher/ Secondary schools are working in Roopnagar city.

Considering the existing population and norms & standards defined for educational institutions, quantitatively the number of institutions is adequate to cater the needs of the education of the city but qualitatively most of the institutions have been found to be deficient in the basic amenities and facilities. The condition of buildings of these institutions in a number of cases has been found to be poor. The classrooms are inadequate to provide appropriate space to the students and accordingly remain crowded. Number of classrooms is also on the lower side. Number of schools does not have adequate open spaces in the vicinity of such institutions. Space occupied by these institutions is also on the lower side when compared with the norms prescribed by various agencies. The situation remains critical particularly in case of educational institutions located within the old city area. Further number of institutions and academies has been found to be operating from residential houses and commercial buildings indicating shortage of space for educational institutions. As far the slum localities are concerned, most of them don't have primary level schools. This leads to lower level of literacy in slum areas which further decreases the skills and productivity of slum dwellers which keeps them in vicious circle of poverty. This calls for providing appropriate numbers of schools in these areas so that slum dwellers have better quality of life and enjoy good health. In view of this, it will be important that educational institutions operating in residential and commercial areas are shifted to appropriate sites earmarked for educational purposes. In addition educational institutions having less areas or absence of play areas etc. are provided with more land in order to meet the basic needs of the students. The new areas to be developed should have appropriate number of institutions imparting education at various levels. The following table shows the availability of educational facilities in Roopnagar and LPA, Roopnagar

| Sr. | Name of Facility                                  | Existing in Numbers |                           |  |  |  |  |

#### 5.2.2. Health Care

A health care provider is an organization that delivers proper care system in a systematic way to an individual in need of health care services. As per information available from census 2001 and field survey there are 97 units of medical facilities of different types providing health services to the residents of Roopnagar city, LPA as well as to the persons from outside the LPA. Out of these units there are 6 hospitals, 4 in Roopnagar city and two in different villages in LPA with a total bed capacity of 168. Total number of Sub Health Centers, Primary Health Centers and Dispensaries has been counted to be 33 in LPA Roopnagar out of which 3 are working in Roopnagar City and the remaining 30 are working in villages falling in LPA, Roopnagar. Besides these, there are 18 small clinics and 11Nursing homes providing medical facilities to the inhabitants of Roopnagar city. Also about 25 private doctors and RMPS are looking after the health of the citizens of Roopnagar city. In addition to this, there are 4 Ayurvedic dispensaries in the LPA, Roopnagar In order to take care of animals and pets there are 8 Veterinary Hospitals and 14 Veterinary Dispensaries working in rest of LPA, Roopnagar

The details of different medical facilities available in Roopnagar city and Local Planning Area, Roopnagar is given in table below:

| Sr. | Name of the Facility                                       | Existing in Numbers |                        |  |  |  |
|-----|--|---------------------|------------------------|--|--|--|
| No. |  | Roopnagar City      | Rest of LPA, Roopnagar |  |  |  |

|     | Total  | 39                  | 58                     |  |  |  |

 Table 26: Medical Facilities in LPA Roopnagar

Source: CMO, Roopnagar and Census of India, Punjab 2001

The study of health care system also reveals that due to lower number of govt. health care units in the city, health care becomes unaffordable for majority of the poor due to high charges of private hospitals. The numbers of beds available at Roopnagar are inadequate to meet the current level needs. In order to provide appropriate level of health care in the city, it will be important that sufficient number of sites should be created at the time of the zoning stage. Moreover spatial distribution of health care units with a proper hierarchy would be critical to serve the entire population.

#### 5.2.3 Sports and Recreational Facilities

Recreational facilities constitute an important element of physical and social development of an individual and for that reason, their provision and balanced spatial distribution at the local, sub-city and city level assumes importance. Accordingly, it would be important that city is divided into compact and sustainable communities and recreational facilities of appropriate order are made available to these communities residing therein. Recreational facilities have been found to exist in the shape of parks and open spaces, cinemas, stadiums, museums, sports related activities, clubs, library and amusement parks etc. Recreational facilities have also been divided into active and passive recreational facilities.

Provision of both these facilities has to be made in order to cater to the essential needs of the individuals and communities.

#### 5.2.4 Parks and Open Spaces

As per the field studies conducted by the Deputy District Town Planner, Roopnagar and the data collected from Municipal Council, Roopnagar, there is one city level park known as Maharaja Ranjit Singh Park near Mini Secretariat. Besides this, there are seven neighborhood parks in the city. The most parts of the city are virtually lacking the parks and open spaces. The number of parks, location and area under these parks is given in table below:

| Sr. | Name of Park               | Location                  | Area in hectares |
|-----|----------------------------|---------------------------|------------------|
| No. |                            |                           |                  |
| 1   | Maharaja Ranjit Singh Park | near Mini Secretariate    | 4.00             |
| 2   | Park                       | Near Jail Singh Nagar     | 0.50             |
| 3   | Park                       | Near I.T.Office           | 1.00             |
| 4   | Park                       | Malhotra Colony           | 1.75             |
| 5.  | Park                       | Malhotra Colony Part<br>2 | 2.00             |
| 6.  | Park Beant Singh           | Aman Nagar                | 2.00             |
| 7.  | Park                       | Sr. Bhagat Singh<br>Nagar | 1.50             |
|     | Total area                 |                           | 12.75            |

Table27: Name, Location and Area under Parks, Roopnagar city:

Sources: M.C Roopnagar and Field study

All the above parks cover an area of about 12.75 hectares. Major parts of the Roopnagar city have been developed in unplanned way, so most of these do not have parks and open spaces. Similarly old parts of the city also lack parks and open spaces. So the existing land for parks and open spaces is inadequate and don't match the planning norms and standards. Thus there is need to create additional parks and properly locating these all over the city.

#### 5.2.5 <u>Cinemas & Multiplexes</u>

There are 2 cinemas in the city catering to the entertainment needs of the residents. These are located near Bhai Lalu Market and J.R. Theater near Dana Mandi, Roopnagar. Besides this, no new cinema or multiplexes are coming up due to slow development of the city. Almost all the Cinemas have adequate space for parking but the location in older parts and on narrow streets/roads are causing traffic problems.

#### 5.2.6 Other Recreational facilities

In addition to the above there are 4 libraries/reading rooms, one stadium and one indoor Badminton stadium and swimming pool in the Roopnagar city which provide recreational facilities to the general public. However, any well organized cultural or drama club has not been noticed in the city thus city is lacking the facility of good theater. There is no Art Gallery etc. in the city for recreational purposes.

# **CHAPTER- VI**

# 6. <u>VISUALISING THE FUTURE</u>

#### 6.1 **Population Projections 2031**

The population is the basic human factor for which planning is done. The requirements of different types of infrastructure for Roopnagar city and for surrounding villages of LPA, Roopnagar in 2031 would be based on the projected population for that year and also migration of population that seeks livelihood in the city. For the purpose of population projections, following two methods have been applied:

- 1. Ratio method or sharing pattern method
- **2.** Extrapolation method: Extrapolation of the past trends and assuming that the trend will continue in future.

In addition to this, the government policies and the opportunities affecting the growth of Roopnagar city and rural areas of LPA, Roopnagar have also been kept in mind.

The following table gives the detail of decadal growth rate of population of Roopnagar city, population of rural areas and total population of LPA, Roopnagar:

 Table 28: Growth Rate of Population of Roopnagar city, Rural Area and LPA,

 Roopnagar - 1981, 1991, 2001

| Year | Roopnagar City |                                | Ru         | ıral                           | Total      |                                |
|------|----------------|--------------------------------|------------|--------------------------------|------------|--------------------------------|
|      | Population     | Growth<br>rate (in<br>percent) | Population | Growth<br>rate (in<br>percent) | Population | Growth<br>rate (in<br>percent) |
| 1981 | 25165          | -                              | 59046      | -                              | 84211      | -                              |
| 1991 | 37996          | 50.99                          | 73226      | 24.01                          | 111222     | 32.07                          |
| 2001 | 49159          | 29.38                          | 87120      | 18.97                          | 135947     | 22.23                          |

(Source: Census of India, Punjab, 1981, 1991, 2001)

# 6.2 <u>Population Projection by Ratio Method or Sharing Pattern</u> <u>Method</u>

In order to achieve more realistic picture of projected population it has been decided to follow the share of urban and rural population of LPA, Roopnagar to the total urban and rural population of Punjab state. Report of the technical group on Population projections constituted by the National Commission on Population entitled "POPULATION PROJECTIONS FOR INDIA AND STATES 2026" has provided projection of Punjab urban, Punjab rural and their share in the total population of the state up to year 2026 as represented in table below:

| Year                                | 2001  | 2006  | 2011  | 2016  | 2021  | 2026   |
|-------------------------------------|-------|-------|-------|-------|-------|--------|
| Punjab Total                        | 24359 | 26059 | 27678 | 29112 | 30323 | 31345  |
| Punjab Urban                        | 8263  | 9439  | 10681 | 11940 | 13185 | 16456  |
| Percentage Urban                    | 33.92 | 36.22 | 38.59 | 41.01 | 43.48 | 52.50  |
| Growth rate of Punjab<br>Urban in % | -     | 14.23 | 13.16 | 11.79 | 10.43 | 24.81  |
| Punjab Rural                        | 16096 | 16620 | 16997 | 17172 | 17138 | 14889  |
| Percentage Rural                    | 66.08 | 63.78 | 61.41 | 58.99 | 56.52 | 47.50  |
| Growth rate of Punjab<br>rural in % | -     | 3.28  | 2.26  | 1.03  | -0.20 | -13.14 |

Table 29: Projected Population of Punjab Total, Punjab Urban and PunjabRural 2001-2026

(Population in Thousands)

The percentage share of Roopnagar city and rural population of LPA, Roopnagar to total urban and rural population respectively of Punjab is calculated and is given in table below:

| Table 30: Percentage share of Roopnaga | r city and Rural Population of LPA,    |
|--|--|
| <b>Roopnagar to Total Urban an</b>     | d Rural Population of Punjab 1981-2001 |
|  |  |

| Percentage share of Roopnagar city<br>to the Total Urban Population of<br>Punjab |      |      | Percentage share of Rural Population of<br>LPA, Roopnagar to Total Rural Population of<br>Punjab |      |      |  |
|--|------|------|--|------|------|--|
| 1981   | 1991 | 2001 | 1981   | 1991 | 2001 |  |
| 0.54   | 0.63 | 0.59 | 0.48   | 0.51 | 0.54 |  |

(Source: Census of India 1981, 1991, 2001)

For projecting the urban population i.e. of Roopnagar city, the percentage of urban population (Roopnagar city) is derived from the total urban population of Punjab in year 2001 which comes out as 0.59%. This figure of 0.59% has been used constantly for projecting the urban population for Roopnagar city for the year 2006, 2011, 2016, 2021, 2026 and 2031. Besides this, the floating population of about 5% has also been added to the projected population.

Similarly, for projecting the rural population of LPA, Roopnagar, the percentage share of LPA, Roopnagar's rural population has been derived from total rural population of Punjab in the year 2001 which comes out as 0.54% and the same has been used constantly for projecting rural population up to the year 2031. The Projected population of Roopnagar city and LPA, Roopnagar rural is given in the table below:

| Year | R                       | oopnagar City   |                                | Rural                   | Rural Areas LPA, Roopnaga      |                         | opnagar                        |
|------|-------------------------|---|--------------------------------|-------------------------|--------------------------------|-------------------------|--------------------------------|
|      | Projected<br>Population | Total<br>Projected<br>Population<br>including<br>5% of total<br>as floating<br>Population | Growth<br>Rate (in<br>percent) | Projected<br>Population | Growth<br>rate (in<br>percent) | Projected<br>Population | Growth<br>Rate (in<br>percent) |
| 2006 | 55000                   | 57750   | -                              | 94500                   | -                              | 150000                  | -                              |
| 2011 | 61000                   | 65000   | 12.55                          | 111000                  | 17.46                          | 164000                  | 9.33                           |
| 2016 | 67000                   | 70500   | 8.46                           | 127500                  | 14.86                          | 178000                  | 8.53                           |
| 2021 | 73000                   | 76600   | 8.65                           | 144000                  | 12.94                          | 192000                  | 7.86                           |
| 2026 | 79000                   | 83000   | 8.35                           | 160500                  | 11.46                          | 206000                  | 7.29                           |
| 2031 | 85000                   | 89000   | 7.23                           | 177000                  | 10.28                          | 220000                  | 6.80                           |

Table 31 Urban and Rural Areas and LPA, Roopnagar

#### 6.3 <u>Population Projection by Extrapolation Method:</u>

Apart from above method, another method is extrapolation of past trends and assuming that the trend will continue in future. The average growth rate of Roopnagar city for past two decades 1981-1991 and 1991 -2001 comes out 40.14% whereas for rural areas it is about 21.46% for past. For calculating the projected population of Roopnagar city, the average growth rate of 40% is assumed for 2011 - 2031. For rural areas, taking into account the trend of growth of LPA, Roopnagar rural, overall growth pattern and Projection of rural areas of Punjab, the growth rate for the decade 2011 - 2031 is assumed as 23%. The above future rates of growth for Roopnagar city and rural areas of LPA, Roopnagar have been projected on certain assumptions given next to table below. The projected population of Roopnagar city, rural areas of LPA, Roopnagar up to year 2031 is given in table below:

# Table 32: Projected Population for Roopnagar City, Rural Areas of LPA,Roopnagar and LPA, Roopnagar

| Year | Roopna     | igar City                  | Rural Areas |                           | LPA,<br>Roopnagar |
|------|------------|----------------------------|-------------|---------------------------|-------------------|
|      | Population | Growth<br>Rate in %<br>age | Population  | Growth<br>rate in<br>%age |                   |
| 2011 | 69000      | -                          | 107600      | -                         | 178000            |
| 2021 | 96600      | 40                         | 132500      | 23                        | 231400            |
| 2031 | 135240     | 40                         | 163000      | 23                        | 300420            |

(Source: Census of India, Punjab 1971, 1981, 1991, 2001)

The following table gives the comparative picture of projected population for Roopnagar city, rural areas and LPA, Roopnagar for 2031 by two methods:

# Table 33: Comparison of Projected Population of Roopnagar City, Rural Areas, LPA, Roopnagar by Two Methods with base year 2001.

| Method   | Roopnagar City<br>Projected Population | Rural Areas<br>Projected Population | LPA, Roopnagar<br>Projected Population |
|----------|--|-------------------------------------|--|
| Method 1 | 85000                                  | 177000                              | 220000                                 |
| Method 2 | 135240                                 | 163000                              | 300420                                 |

# 6.4 Workforce Projections

For calculating the workforce projection of MC, Roopnagar:

(i) Roopnagar town

Category wise Employment data is available for Roopnagar town To estimate category wise employment, for the year 2031 certain assumptions have been made as:

- Employment Pattern of Roopnagar town will be same as observed in 2001
- Employment pattern of other towns will be similar to District Urban (excluding Roopnagar Municipal Council.)

Table No.33a: Existing Total Workers and Employment Category Wise of Constituent Areas of LPA Roopnagar

| Data and assumptions<br>2001 |                                 | Roopnagar(M<br>Council) 2001 | Total<br>Workers as % of Population and categories<br>as % of Total workers |
|------------------------------|---------------------------------|------------------------------|---|
|                              | Population                      | 49159                        |   |
|                              | Total workers                   | 15350                        |   |
| A                            | Cultivators                     | 139                          | 0.9   |

|   | Agriculture Hunting Forestry | 369                    |  |
|   | Household Industry           | 316                    |  |
|   | Others                       | 24637                  |  |
| 3 | Marginal Workers             | 791                    |  |
|   | Total workers                | 26350                  |  |

#### 6.5 **Population Density**

#### 6.5.1 Existing Land Use Plan:

The area under 129 villages is 1092.83 hectares (2699.29 acres) and the population in the year 2001 was 87120. The density comes to 32 persons per acre.

The area in the city limits is 207.671 hectares (512.94 acres) and the population was 49159 in the year 2001. The density comes to 95 persons per acre.

#### 6.5.2 Proposed Land Use Plan:

The proposed land use area under LPA under residential use is 2298.031 hectares (5676.13 acres) and the population projected in the year 2031 is 2,20,000. The density comes to 38 persons per acre.

The proposed land use area in the city limit is 538.649 hectares (1330.46 acres) and the population projected till 2031 is 85,000. The density comes to 63 persons per acre.

# 6.6 Infrastructural Proposal

#### 6.6.1 Water Supply and Distribution

Within the Roopnagar LPA, there is already water service available to serve existing developments in the built-up areas and villages. However, that will not be able to support the various developments planned for the entire LPA. In order to realise the proposals put forth in the master plan, a centralized water supply and distribution system will be needed.

# 6.6.2 <u>Water Demand Projection</u>

Projection of future demand for water is a very crucial step needed in order to determine water resource allocation.

# 6.6.3 <u>Water demand assumptions</u>

The following assumptions have been adopted to derive the water demand requirement for the Roopnagar LPA:

• Unit water demand:

| Land Use                             | Unit Water<br>Demand* |
|--------------------------------------|-----------------------|
| Residential                          | 250 lpcd              |
| Rural Settlements                    | 100 lpcd              |
| Industrial                           | 45 cum/ha/d           |
| Commercial, Institutional, Utilities | 45 cum/ha/d           |
| Roads                                | 5 cum/ha/d            |
| Green Area                           | 60 cum/ha/d           |
|                                      |                       |

\* lpcd = litre per capita per day.

\* cum/ha/d = cubic metre per hectare per day.

• *Fire fighting demand:* 

Fire demand in kilolitres per day is worked out using the formula  $100\sqrt{p}$ , where p = population in thousands.

• Water transmission and distribution losses:

The total water loss of 15% comprises 5% of transmission loss and 10% of distribution loss.

• *Workforce consumption:* 

This has been incorporated into the respective unit demand.

• *Recycled water:* 

This will be used mainly for irrigation purposes.

• Green area:

10% of each plot's area is to be set aside as green area. This applies for residential, commercial, industrial, institutional and utility uses. Recycled water will be used for watering the green and for gardening.

 Water demand for agriculture land: This has been excluded for the projection of water demand.

#### 6.6.4 Water demand estimation

The estimated water demand requirement for the LPA by Year 2031 is 154 MLD. This comprises 104 MLD of potable water and 50 MLD of recycled water.

Since the sewage treatment plant for Roopnagar can only generate about 80 MLD of recycled water.

| Table 35: | Projected water demand | (Year 2031*) |
|-----------|------------------------|--------------|
|           |                        |              |

| Potable | Recycled | Total |
|---------|----------|-------|
| 104     | 50       | 154   |

#### 6.7 <u>Proposed Water Supply and Distribution System</u>

The proposed water supply and distribution network have been designed in accordance with international standards, modified where appropriate to conform to local conditions in India.

The network is based on the grid-iron system, where all arterial and secondary mains are looped and interconnected to eliminate dead ends. This system will facilitate water circulation and prevent it from stagnating, so that it will not develop tastes and odours. Specifically, two independent supply and distribution systems have been proposed: One is for potable water and the other, recycled water.

#### 6.7.1 Potable water supply and distribution

To achieve sustainable development, various water sources have to be tapped upon, including:

- Surface water;
- Ground water; and
- Rainwater.

Among these, surface water will be the main source of potable water because of its availability and reliability. Ground water and rainwater collected act to supplement any shortages in supply.

As the service corridor within the typical road sections does not include water supply lines, dedicated reserves are needed. The proposed potable water supply main is shown in Figure

Each of the proposed water works will serve users located within its respective water distribution zone. Clear water will be channeled to these users via the potable water distribution main

#### 6.7.2 Recycled water supply and distribution

As stated earlier, a separate system has been proposed for the supply and distribution of recycled water. Sewage generated from the LPA will be collected and sent to the sewage treatment plant STP 7 for treatment up to the tertiary level. This will meet the requirements for the purpose of irrigation.

#### 6.8 <u>Surface Water Drainage</u>

The proposed surface drainage system for the Roopnagar LPA is based on projections up to Year 2031. It is designed to adhere to the existing terrain as much as possible, with existing rivers and canals serving as discharge outlet points. By channeling storm water and surface runoff from the roads and various development plots into the existing rivers, the risk of flooding is mitigated, especially during the wet season between July and September every year. According to the Metrological Department, the amount of annual rainfall in the GMR varies between 900 mm to 1,000 mm. The wet season is typically from July to September every year.

#### 6.9 Land Use Requirements

Before proceeding to prepare proposed land use plan and transport network the areas required for different purposes is to be worked out on the basis of norms and standards of various organizations.

| Town               | Year | No. of Families | Net Land Required in | Gross Land in |
|--------------------|------|-----------------|----------------------|---------------|
|                    |      |                 | hectare (Assumed 1   | hectares      |
|                    |      |                 | family plot)         |               |
| Roopnagar M.C      | 2011 | 12200           | 271                  | 542           |
|                    | 2016 | 13400           | 298                  | 596           |
|                    | 2021 | 14600           | 324                  | 648           |
|                    | 2026 | 15800           | 351                  | 702           |
|                    | 2031 | 17000           | 378                  | 756           |
| Roopnagar<br>Rural | 2011 | 22200           | 493                  | 986           |
|                    | 2016 | 25500           | 567                  | 1134          |
|                    | 2021 | 28800           | 640                  | 1280          |
|                    | 2026 | 32100           | 713                  | 1426          |
|                    | 2031 | 35400           | 787                  | 1574          |
| Total              | 2011 | 30000           | 667                  | 1334          |
|                    | 2016 | 32800           | 729                  | 1458          |
|                    | 2021 | 35600           | 791                  | 1582          |
|                    | 2026 | 41200           | 915                  | 1830          |
|                    | 2031 | 44000           | 978                  | 1956          |

Table No.36: Stage Wise Residential Area Requirements for Roopnagar L.P.A (2011-2031)

**Note:** Assumed family size = 5

50% area is assumed under convenient shopping, roads, parks & open spaces and public buildings etc.

Assumed 1 family per plot

| Name of Centre   | Area per 1000 persons (sq.m.) | Number of shops   |  |  |
|------------------|-------------------------------|-------------------|--|--|
| Cluster Centre   | 220                           | 1 for 110 persons |  |  |
| Sector Centre    | 300                           | 1 for 200 persons |  |  |
| Community Centre | 500                           | 1 for 200 persons |  |  |
| District Centre  | 880                           | 1 for 300 persons |  |  |
| Total            | 1900                          |                   |  |  |

Table No.37: Area of Commercial Centers

As per the figures given in the table above 1900 sq. mts. area for different categories of commercial areas has been proposed for 1000 persons thus 1.9 sq. mts (say 2 Sq. mts.) area is required per person.

| Table No.38:    | <b>Commercial Area Rea</b> | uirements for Urban  | Areas of LPA Roopnagar  |

| 9.     | Industrial                                 | 5 to 6 units per 1000 employees                    |  |  |

# Industrial

A total projected industrial worker for L.P.A. Roopnagar is 5270 for the year- 2031. The projected industrial workers have been calculated taking 20% of total workers (which is 33% of Population).

The efforts have been made to work out the actual requirements of industrial area for urban settlements falling in LPA Roopnagar as follows:

Table No.41: Projected Urbanisable Area Requirements for Roopnagar Municipal Areas-2031

| S. No | Town      | Year | Gross Residential<br>Land required | Urbanisable<br>area<br>required* | Industrial use<br>requirement ** |
|-------|-----------|------|------------------------------------|----------------------------------|----------------------------------|
| 1     | Roopnagar | 2011 | 542                                | 1355                             | 108.4                            |
|       |           | 2016 | 596                                |                                  | 1490 119.2                       |
|       |           | 2021 | 648                                | 1620                             | 129.6                            |
|       |           | 2026 | 702                                | 1755                             | 140.4                            |
|       |           | 2031 | 756                                | 1890                             | 151.2                            |

Note:

• For calculating the Urbanisable area the residential use is assumed as 40% of the total urbanisable area for Roopnagar town.

\*\* Industrial use = 8% (assumed) for Roopnagar town of total urbanisable area as per UDPFI standards.

- The proposals have been marked keeping its regional and location importance into consideration of Roopnagar and these will not only act as an independent self sustaining town/town but will also act as a regional focus centre to serve the higher level infrastructure to the surrounding settlement in the near vicinity.
- The area of M.C. Roopnagar is 2500 hectares. Keeping its potential of development like industrial, institutional and wholesale into consideration urbanisable area of Roopnagar is marked.

## Land required for social infrastructure:-

The land requirement of social infrastructure for Health Care, Police, and Fire, Education and Recreational facilities for Roopnagar urban is calculated as below:

# Table No.42: Land Requirement for Educational Facilities (for 100000 populations)-LPARoopnagar

|                    | Norms  | No. of units | Area/unit<br>(in ha.) | Total area (in ha) |
|--------------------|--------|--------------|-----------------------|--------------------|
| College            | 100000 | 2            | 4                     | 8                  |
| Secondary School   | 7500   | 29           | 1.6                   | 46.4               |
| Primary School     | 5000   | 44           | 0.4                   | 17.6               |
| Pre-primary school | 2500   | 88           | 0.08                  | 7.04               |
| Total              |        |              |                       | 79.04 ha.          |

| Table No.43: Land Requirement for Higher Educat | tional Facilities (LPA Roopnagar) |
|---|-----------------------------------|
| - ····· - · · · · · · · · · · · · · · ·         |                                   |

| Sr.no | Category                       | Norms and standards (UDPFI)               |      |     | Requirement |  |
|-------|--------------------------------|---|------|-----|-------------|--|
|       |                                | Population/Unit                           |      | No. | Area (ha)   |  |
|       |                                |   | (ha) |     |             |  |
| 1     | Technical education            |   |      |     |             |  |
| (i)   | Technical education centre (A) | 10 lakh                                   | 4    | -   | -           |  |
| (ii)  | Technical centre (B)           | 10 lakh                                   | 4    | -   | -           |  |
| 2     | Professional education         |   |      |     |             |  |
| (i)   | New Engineering college        | 1 sites to be provided in urban extension | 60   | 1   | 60          |  |
| (ii)  | New medical college            | 1 sites to be provided in urban extension | 15   | 1   | 15          |  |
|       | Total                          |   |      |     | 75          |  |

Total area required for educational facilities =154.04 hectares

Keeping Roopnagar's regional importance into consideration, higher level educational facilities like technical and professional colleges are proposed in Roopnagar. It will not only serve Roopnagar but its adjoining towns.

Table No.44: Land Requirement for Medical Facilities (for 250,000 persons) (LPA Roopnagar)

| Medical Facility          | Norms      |                          | Requirements |                        |
|---------------------------|------------|--------------------------|--------------|------------------------|
|                           | Population | Area/unit<br>(in hects.) | No. of units | Total area (in hects.) |
| Intermediate (Category-A) | 100000     | 2.7                      | -            | -                      |
| Intermediate (Category-B) | 100000     | 0.6                      | -            | -                      |
| Dispensary                | 15000      | 0.1                      | 15           | 1.5                    |
| Total                     |            |                          |              | 1.5 ha                 |

- Total area required for medical facilities =.1.5 ha
- Total area under institutions = 154.04 ha

#### Land Requirement for Police. (For 100,000 persons)

|                | Norms  | No. of units | Area/unit (in<br>ha.) | Total area (in ha.) |
|----------------|--------|--------------|-----------------------|---------------------|

# 6.10 THE STRENGTH, WEAKNESS, OPPORTUNITIES, THREATS (SWOT) ANALYSIS OF LPA

The present strengths, the opportunities likely to be presented by the surrounding region, the present weaknesses of Roopnagar city and the threats emanating in the region have been deliberated in the meetings. The following Strengths, Weaknesses, Opportunities and Threats for Local Planning Area Roopnagar have emerged:-

## **Strengths and opportunities:**

The strengths and opportunities are the factors which allow positive change or present development options or alternatives. The following are the strengths and opportunities in the context of vision and strategies for Local Planning Area, Roopnagar.

- I. Proximity to State Capital Chandigarh.
- II. Accessibility: Well connected to surrounding region through NH-21(Chandigarh -Manali road), SH-24 (Roopnagar- Hoshiarpur road) and Kurali- Morinda road.
- III. Regional level educational infrastructure Degree colleges, Polytehchnic colleges, Nursing colleges, Rayat and Bahra institutes are sufficient catalyst to propel the economy.
- IV. Industrial hub The city of Roopnagar has number of medium and large scale industrial units like Cotton ginning Mills, Oil extraction mills and other agro based industries etc along with small scale industrial units dealing with products like manufacturing of utensils, farm implements, kin now polishing, cotton ginning etc.
- V. Employment potential Good employment generation due to industries, trade and commerce.
- VI. Regional level commercial centre Old Bazar in the city and grain market are the regional level commercial facilities not only serving the town but the surrounding region also.
- VII. Health Infrastructure Roopnagar has 97 units of medical facilities of different types providing health services to the residents of Roopnagar city, LPA as well as to the persons from outside the LPA.
- VIII. Religious pilgrimage Kiratpur sahib Gurudwara located in city and Anandpur Sahib in Roopnagar District is historical town etc.

# Weaknesses and Threats:

- I. Concentration of commercial activities in congested area of the old part of city with narrow lanes, no parking spaces etc are creating major traffic and environmental problems.
- II. Nearness to Satlej River acts as hindrance to the growth of the city due to the flooding factor.
- III. Undulating topography of the city is one of the obstructions in the laying of roads and infrastructure.
- IV. Traffic hazardous choked road intersections, mixed and through traffic, inadequate road circulation, encroachment of roads, inadequate parking spaces, lack of flyovers, ROB's / underpasses etc with limited recreational / open spaces renders the city unfit for comfortable living.
- V. Inadequate storm water drainage no system for rain water harvesting and no system available for scientific disposal of solid waste a potential threat to living environment.
- VI. Exorbitant urban land prices. Poor cannot afford good housing accommodation, which causes proliferation of slums and squatters. It also hinders the pace of development of the city, as people like to settle in the nearby small towns where land prices are lower as compared to Roopnagar city.

# 6.11 VISION 2031

The Vision Roopnagar 2031 is proposed to be

To make LPA Roopnagar an economically vibrant city with quality infrastructure and housing for all its citizens in environmentally sustainable manner achieved through effective partnership between the public, private and community sector.

Various components of the vision and strategies to attain them particularly in the context of Master Plan are outlined below:

#### 6.12 **STRATEGIES**

Strategies developed for various planning elements of the VISION 2031 are tabulated as below:

| Table | No. | 47: | Strategies | for | Vision | 2031 |
|-------|-----|-----|------------|-----|--------|------|
|       |     |     |            |     |        |      |

| VISION 2031   | Strategies   |
|---|--|
| To develop Roopnagar city as financial  | ☐ Through better urban governance.   |
| capital, commercially and industrially<br>vibrant eco-friendly city of state of Punjab<br>providing assured employment and quality<br>living to all its existing and future | Allocation of sufficient land for industrial<br>and commercial activity to provide a<br>comprehensive range of retail and<br>wholesale commercial services and<br>provision for light and service industries   |
| residents.  | <ul> <li>such as IT Parks, Knowledge City etc.</li> <li>To ensure minimal environmental impact<br/>on the residents. Clustering concept to be<br/>adopted. Polluting industries to be kept<br/>away from the residential areas.</li> <li>Higher order of economic productivity,</li> </ul>   |
|   | <ul> <li>operational efficiency.</li> <li>Rationalized land use pattern.</li> <li>Reduced vehicular and industrial pollution through introduction of CNG</li> </ul>  |
|   | based transport, by increasing green<br>cover, ban on pressure horns and by<br>planning non-polluted and eco-friendly<br>economic activities, introducing mass<br>public transport system, keeping<br>industrial locations properly<br>segregated through the concept of<br>buffer zones from non-industrial areas<br>and by allocating land for polluting<br>industry away from the living areas. |
|   | □ Assured safety of residents and commuters.   |
| To provide variety and range of housing<br>types for working and living communities<br>within LPA, Roopnagar.   | <ul> <li>Promoting the concept of PPP, provision of adequate good quality housing by promoting planned development through effective city planning to provide safe, clean environment with adequate level of amenities.</li> <li>Making urban development policy</li> </ul>  |
|   | liberal, incentive oriented and user friendly.   |

|  | Promoting social (low cost) housing<br>for Economically Weaker Sections for<br>the eradication of slum dwellings. |
|--|---|
| To plan LPA as an integrated and single                | $\Box$ Plan should relate and respect the   |
| unit with strong forward as well as backward linkages. | surrounding region.   |
| backward mikages.                                      | □ Attempt to plan in totality and must confirm to the surroundings of Local                                       |
|  | Planning Area, Roopnagar.   |
| To provide efficient Transportation System             | □ To create new road network and to   |
|  | improve the existing network.   |
|  | □ To promote operational efficiency of traffic by introducing a Bing Boad on                                      |
|  | traffic by introducing a Ring Road, an Air link, Elevated Roads, Flyovers,  |
|  | ROB's, Underpasses, Subways, New  |
|  | sector roads, bus and truck terminus,   |
|  | provision of pedestrian paths,  |
|  | segregated lanes for slow moving traffic, minimizing use of private   |
|  | transport and to promote public   |
|  | transport.  |
| To provide state of the art, infrastructure            | □ Social infrastructure shall be made   |
| like education, health, religious,                     | available in the following manner:  |

| To provide utilities that will satisfy the             | □ To ensure 100% coverage of the city in  |
| needs of the residents of Local Planning Area.         | terms of Water Supply, Sewerage System etc.   |
|  | $\Box$ To minimize the ground water   |
|  | consumption by promoting water  |
|  |   |

|   | conservation.   |
|---|---|
|   | □ To promote rain water harvesting and recycling of water.                                      |
|   | □ To promote eco-friendly decentralized   |
|   | treatment system.   |
|   | □ To minimize sewerage generation through water saving appliances.                              |
|   | 0 11  |
| To action and an house the manipus      | □ To promote recycling of sewage.   |
| To safeguard and enhance the premium    | □ Through introducing special   |
| land value along the major highways and | development controls along major  |
| high visibility locations.              | roads.  |
|   | □ By providing premium land use zones.  |
| Decongestion of core areas.             | Development of modern retail, hotel   |
|   | and commercial facilities such as retail  |
|   | malls, entertainment and shopping in  |
|   | peri urban areas and along the major  |
|   | transport routes.   |
|   | □ TDR policy may be framed and made applicable for this purpose.                                |
| To streamline the energy of young       | $\Box$ Special emphasis should be made to   |
| population.                             | create a conducive environment for  |
|   | sports through a range of Stadiums,   |
|   | Sports Complexes, Country Clubs,  |
|   | Golf Courses, parks etc.  |
| To promote Rain Water Harvesting.       | □ Optimal use of rain water for irrigating  |
|   | the parks and roadside plantation in  |
|   | new colonies / development  |
|   | □ To promote protection of natural water  |
|   | bodies for collection of rain water.  |
|   | □ To promote optimum use of storm   |
|   | water as an alternative source of water   |
|   | supply.   |
|   | □ Make Rain Water harvesting systems  |
|   | compulsory for each parcel of land and  |
|   | the water so stored may be used for car   |
|   | washing, kitchen gardens, construction  |
|   | works etc.  |
|   | <ul> <li>Major parks / open spaces to be made<br/>available for providing rain water</li> </ul> |
|   | harvesting systems so that the storm  |
|   | water of road network etc may be used   |
|   | for recharging of underground water.  |
| To promote an eco-friendly Solid Waste  | <ul> <li>Minimize the generation of solid waste</li> </ul>                                      |
| Management system                       | by using re-usable items.   |
| <u> </u>                                |   |

| To introduce the concept of Mixed Land<br>use for the localities which through the<br>history of growth of town had remained<br>under mixed use and the nature of use is<br>such which does not include obnoxious,<br>hazardous or highly polluting activities and<br>from where it is difficult to shift the mixed<br>use to other areas specified for that<br>particular land use. | <ul> <li>Promote recycling of solid waste.</li> <li>Installation of Solid Waste Processing<br/>Plants to reduce the waste for disposal<br/>and at the same time for generating<br/>energy from the solid waste.</li> <li>Small processing plants at the<br/>Neighborhood level may be preferred.</li> <li>Co-existence of houses and shops and<br/>houses with industries to be allowed<br/>subject to certain Development<br/>Controls that should ensure the<br/>protection of living environment of<br/>mixed land use zones.</li> </ul> |
|--|---|
|--|---|

# **CHAPTER VII**

# 7. <u>THE MASTER PLAN</u>

#### 7.1 Components of the Master Plan

Master Plan is an important instrument for guiding and regulating development of a town over a period of time and contributing to planned development both conceptually and operationally. Master Plan has been considered as one of the most effective mechanism to promote planned growth of the urban centres. It lays down the road map, agenda and framework within which the town growth is envisioned.

Under the Punjab Regional & Town Planning & Development Act, 1995, master plan of a Local Planning Area shall;

- a) indicate broadly the manner in which the land in the area should be used;
- b) allocate areas or zones of land for use for different purpose;
- c) Indicate, define and provide the existing and proposed highways, roads, major streets and other lines of communication.

d) indicate areas covered under heritage site and the manner in which protection, preservation and conservation of such site including its regulation and control of

development which is either affecting the heritage site or its vicinity, shall be carried out;

e) Include regulations (hereinafter called "Zoning Regulations") to regulate within each Zone the location, height, number of storey's and size of buildings and other structures, open spaces and the use of buildings, structures and land.

#### 7.2 Master Plan Objectives

The Master Plan objectives represent policy and planning guidelines for identifying and evaluating the development alternatives by more clearly defining the future needs of the area. The overall focus and objective of the Master Plan is growth management.

The following objectives have guided the development of the Master Plan of for Roopnagar:

- To control haphazard, unplanned and sub-standard growth and development of the town and to achieve planned growth to create healthy environment.
- Identify appropriate locations for commercial and business development opportunities that advance long-term economic interest in the area and are consistent with the land use planning and development objectives of local authorities/government.
- To ensure safety, mobility and efficiency of traffic within the town through the mechanism of rationalizing the land use pattern defined in the Master Plan.
- To preserve natural resources and eco system and maintain a safe and secure operating environment.
- To improve the capacity of the existing road net work through redesigned, improved road geometry and removal of encroachments.
- To protect and preserve open space and make land available for public purposes.
- To optimize the use of available land resource through well defined development norms and to minimize diversion of valuable agricultural land for non-agricultural purposes.
- To examine potential future development that will detrimentally impact natural and cultural resources in the Town, particularly in view of the marginal nature of much of the remaining undeveloped land.
- To rationalize the distribution of physical and social infrastructure in order to ensure appropriate quality of life to all the residents of the town.
- To ensure safety, mobility and efficiency of inter and intra-town traffic.

# 7.3 Evaluation of Alternative Town Structures:

# 7.3.1 Evaluation of Existing Structure

Evaluation of existing town structures helps in deriving alternative town structures. Different alternative town structures are made based upon the existing town scenario to adopt the future town structure.

A careful study of this map brings out the following:

- Work Areas
- Living Areas (Planned)
- Living Areas (Unplanned)
- Slum Areas

### Work Areas

Grain Market is the major work place of Roopnagar town, covering an area of about 23.844 hectares is located on Roopnagar - Kurali road near Bhatha Sahib Gurudwara. The city of Roopnagar has medium and large scale industrial units like Cotton ginning Mills, Oil extraction mills and other agro based industries etc along with small scale industrial units dealing with products like manufacturing of utensils, farm implements, kin now polishing, cotton ginning etc. The Wholesale grain market

# **Living Areas**

The main living areas which are developed by various agencies like PUDA and Municipal Council and Improvement trust. There are 15 T.P Schemes and 8 Development Schemes of Improvement Trust, Roopnagar, Four commercial cum residential development schemes and 4 commercial schemes under Punjab Apartment and Property Regulation Act 1995'.

# Slum Areas

There are number of slums areas situated along major roads and the railway track passing through the city.

# 7.3.2 Alternative town structures -2031

Unchecked, unplanned and haphazard growth of areas is the eyesore of any town. Cities and towns are expanding in all directions resulting in large-scale urban sprawl and results in changes in the pattern of urban land use. It is the need of the hour to take steps to control the unplanned growth and plan for sustainable and healthy development of urban areas.

Keeping in view the present growth trend three different alternative structures could be envisaged for the future town of Roopnagar. The different alternatives are as follows:

- 1. Compact core with expansion along main Axes
- 2. Development along main highways
- 3. Development at potential road intersections

# 1. Alternate –I: Compact core with expansion along main Axis:

This alternative is based on the trend of residential colonies and commercial development along the main axis such as Bela road, Relo road and Morinda road. Compact core with expansion along main axis minimizes the conversion of agriculture land into urban use and it follows the present growth trend of the town. These developments give the base to think upon this alternative to propose the future town along main axis.

#### **Merits:**

- Compact and integrated development of the town, avoiding sprawl
- An effective, economic and efficient infrastructure development
- Minimum invasion upon fertile and scarce land resource of the state.
- Close relationship of work-place and residential areas

#### **Demerits:**

- Improving core town infrastructure to cope with increased population may be difficult.
- It may put extra pressure on main road.
- It may create a feeling of congestion and more load on existing infrastructures

# 2. Alternate – II: Development along main Highways:

This alternative provides the opportunities to develop future town of Roopnagar along the main highways passing through the town. The upcoming residential colonies on Morinda road, Relo road and Bela road and cluster of other development activities such as Industries on Nwanshahr road and other developments like Grain Market , hotel and marriage palaces attract the future development of the town towards the respective potential areas along main arteries besides areas all- around the existing town.

#### **Merits:**

• Maximum utilization of existing infrastructure specifically the accessibility being provided by the main highway and Rail network.

• Provides new avenues of development on basis of the existing trend of growth of the town.

#### **Demerits:**

- Ribbon development around main roads would take place.
- May be difficult to provide infrastructure up to long distances
- May invade upon large area of fertile land.

# 3. Alternate – III Development at Potential intersections:

While studying the existing road network of LPA Roopnagar and some proposed linkages, it is found that certain very important road junctions are coming up on all sides of Roopnagar city which may prove to be potential nodal centers of development around the existing Roopnagar town. Besides the potentiality due to future road intersections, all these nodal centers are having their own justification and reasons to grow.

#### **Merits:**

- Would provide relief to the core town
- Would provide broader base for future expansion
- Conducive to present trends and increasing car ownership.

#### **Demerits:**

- May be difficult to integrate the infrastructure in near future.
- May be disastrous for limited fertile land resource of the state
- This type of leapfrogged development may not help maintain a close relationship between residence and place of work.
- All these centers may not fully develop by 2031 and the growth may appear to be a sprawl for quite some time.

It would be useful to keep in view and consider all the above alternatives and select the optimal. The merits and demerits of the alternatives are brought out from the basic spatial planning objectives like preventing sprawl, promoting compact cities to protect fertile farmlands. Each alternative have its own Merits and Demerits and we have to work on combination of these alternatives as per the feasibility.

# 7.4 Strategies to obtain land for public purposes

The possible alternatives for obtaining land for public purposes such as roads, educational, health, parks, water supply, sewerage, social and religious institutes, old age homes, community centers etc with their limitations are listed as below:

| Alternative                  | Land Acquisition<br>through 1894 Act  | TDR  | Development of land through<br>PAPR Act 1995, TDS under<br>PRTPD Act 2006 and<br>Development Schemes under<br>PTI Act, 1922  | Land Pooling  | Govt /<br>Panchayat /<br>Waqf Board<br>lands  |
|------------------------------|---|--|--|---|---|
| Plan<br>Proposal             | Land designated for<br>public purposes  | Land designated<br>for public<br>purposes  | Land designated for public purposes  | Land designated<br>for public<br>purposes   | Land<br>designated for<br>public purposes   |
| Regulation                   | No separate<br>regulatory<br>provision necessary  | Regulation about<br>use of TDR on<br>receiving plots is<br>necessary   | Certain proportion (about 40%) of<br>land is dedicated for public<br>purposes.   | This requires a<br>separate legal<br>process to be<br>followed of<br>reconstitution of<br>plots along with<br>evaluation of<br>compensation and<br>betterment as<br>provided in<br>Chapter XII of the<br>1995 Act.  | No separate<br>regulatory<br>provision<br>necessary   |
| Means of<br>securing<br>land | Compulsory<br>acquisition by<br>paying monetary<br>compensation   | Monetary<br>compensation<br>substituted by<br>Transfer of<br>Development<br>Rights (TDR)   | Availability of land through layout<br>plan provisions   |   | Land can be<br>made available<br>through<br>transfer of<br>ownership<br>from one<br>department to<br>another. No<br>monetary<br>compensation<br>is involved.  |
| Limitations                  | □ Lack of<br>finances for<br>compensation<br>□ Landowners'<br>resistance<br>□ Iniquitous<br>distribution of<br>costs and<br>benefits. Cost<br>borne by those<br>who lose land and<br>benefits enjoyed<br>by surrounding<br>landowners | <ul> <li>□ Landowners' acceptance depends upon market for TDRs</li> <li>□ But where real estate prices are high particularly where land price is several times the construction cost, chances of success are high.</li> <li>□ Could also be used for heritage conservation.</li> <li>□ New concept difficult to be implemented.</li> </ul> | <ul> <li>□ This is the method currently relied upon where minimum area for colony is set at 10 – 75 acres, as in case of PAPRA.</li> <li>□ This is to be market driven and present response is said to be not so encouraging.</li> </ul> | <ul> <li>Comprehensiv <ul> <li>Land Pooling</li> <li>Policy is</li> <li>required to be</li> <li>framed.</li> <li>Difficulty in</li> <li>pooling of land</li> <li>of large number</li> <li>of owners.</li> <li>Time</li> <li>consuming and</li> <li>complicated</li> <li>process</li> <li>Equitable</li> <li>distribution of</li> <li>costs and</li> <li>benefits to</li> <li>different share</li> <li>holders.</li> <li>New concept</li> <li>difficult to be</li> <li>implemented.</li> </ul></li></ul> | <ul> <li>□ Locational disadvantages in certain cases.</li> <li>□ Minimum area requirement may not be fulfilled</li> <li>□ Source of revenue for Panchayat Bodies / Waqf Board gets depleted.</li> </ul> |

No single alternative may be applied on the entire area of the LPA. Different alternatives have to be used depending upon the nature, size, location and necessity of the project. In case of projects linked with defence / security needs of the country or the projects where large chunks of land are required for the timely implementation of the project only the method of land acquisition through the 1894 Act has to be used. The land required for new Master Plan roads or for widening of existing roads may be obtained largely by allowing the development rights of road land being allowed to be used on the remainder of the land. The second option could be to get the land through land pooling scheme. The area for other roads which are not shown in the Master Plan but are to be shown later in Zonal Plans could be similarly obtained. For other public purposes like parks, community centres, schools, dispensaries, play grounds etc the land may be obtained through colonization under PAPRA 1995 or through the development of Town Development Schemes under the Punjab Regional and Town Planning and Development (Amendment) Act 2006. The government / Panchayat lands may be another option for the development of such public uses. However, there are certain public purposes like police stations, fire stations etc that must be at specific locations and are to be developed in a time bound manner. These need specific designation in the sector (zonal) plan. Such lands may be obtained without monetary compensation and for this, it would be necessary to create market for TDR, certain parts in the sector plan like commercial centres and pockets reserved for group housing may be allowed to exceed base FAR by buying Development Rights from elsewhere in the same sector.

#### 7.5 <u>Proposed Land Use Plan L.P.A.Roopnagar</u>

After going through the detailed study conducted by the office of D.D.T.P. Roopnagar pertaining to LPA Roopnagar and discussions held with different level i.e. with Chief Town Planner and Senior Town Planner and further based on analysis, assumptions and projected population of L.P.A.Roopnagar. The proposed Land Use Plan 2031 has been prepared, in which different land use zones have been earmarked such as residential, commercial, industrial, rural and agricultural etc.

After examining the various possibilities and taking into account, the pattern suggested in Urban Development Plans Formulation & Implementation Guidelines published by Ministry of Home Affairs and Employment, Govt. of India, New Delhi, the aforesaid land use categories have been adopted for the proposed land use plan. The other concerned aspects of these different land uses have been detailed out in the following sub head:

| NAME OF LANDUSE  | Area in<br>hect. | % age to the total area | %age of<br>Urbanisable<br>area |
|--|------------------|-------------------------|--------------------------------|
| Residential  | 2866.50          | 11.88                   | 41.04                          |
| Abadies  | 646.50           |                         |                                |
| Residential Area   | 2220.00          |                         |                                |
| Commercial   | 1567.55          | 6.49                    | 22.4                           |
| Commercial   | 42.08            |                         |                                |
| Whole Sale Market, Fruit & Vegetables and Grain<br>Market, Godowns, Ware Housing, Cold Storage | 32.01            |                         |                                |
| Commercial Mix   | 1493.46          |                         |                                |
| Industrial   | 439.13           | 1.82                    | 6.3                            |
| Small Scale, Light and Service Industry  |                  |                         |                                |
| Medium & Large Scale Industry  |                  |                         |                                |
| Recreational   | 388.63           | 1.61                    | 5.6                            |
| Parks /Play ground / Parking   | 3.20             |                         |                                |
| Stadium & Sports Complex   | 308.06           |                         |                                |
| Religious Places   | 77.37            |                         |                                |
| Traffic and Transportation   | 828.01           | 3.43                    | 11.9                           |
| Rail Terminal and yard & Railway Station   | 1.46             |                         |                                |
| Bus Terminal and depot   | 1.75             |                         |                                |
| Truck Stand  | 29.67            |                         |                                |
| Major Roads/Other Roads  | 662.71           |                         |                                |
| Proposed Road 60' Wide   | 4.13             |                         |                                |
| Proposed Road 80' Wide   | 21.33            |                         |                                |
| Proposed Road 100' Wide  | 62.46            |                         |                                |
| Proposed Road 200' Wide  | 44.50            |                         |                                |
| Utilities & Services   | 4.82             | 0.02                    | 0.1                            |
| Power house/Sub Station & Electric Grid  | 4.11             |                         |                                |
| Sewerage Disposal area   | 0.64             |                         |                                |
| Solid Waste dumping/ Sanitary landfill   | 0.07             |                         |                                |
| Government   | 94.64            | 0.39                    | 1.4                            |
| Government /Public Office  | 54.29            |                         |                                |
| Govt Land  | 40.35            |                         |                                |
| Public & Semi-Public   | 730.91           | 3.03                    | 10.5                           |
| Hospital and Health institution  | 6.34             |                         |                                |
| Educational And Research Centre Specialised<br>Educational institutes                          | 700.64           |                         |                                |
| Social and Cultural  | 4.89             |                         |                                |
| Cremation and Burial grounds   | 19.04            |                         |                                |
| Reserved Area  | 64.08            | 0.26                    | 0.7                            |

 Table
 48: Break up of Major Proposed Land Uses LPA Roopnagar 2031

| NAME OF LANDUSE                        | Area in<br>hect. | % age to the<br>total area | %age of<br>Urbanisable<br>area |
|--|------------------|----------------------------|--------------------------------|
| URBANISABLE AREA                       | 6984.27          |                            | 100                            |
| Rural and Agricultural                 | 17147.22         | 71.06                      |                                |
| Agricultural Area                      | 11250.55         |                            |                                |
| Pond/Water bodies, Swampy, Waterlogged | 28.33            |                            |                                |
| Canal & Distributory                   | 268.59           |                            |                                |
| Drain                                  | 1246.22          |                            |                                |
| Green Buffer                           | 152.34           |                            |                                |
| Forest                                 | 4201.19          |                            |                                |
|  |                  |                            |                                |
| TOTAL                                  | 24131.49         | 99.99                      |                                |

Source: PRSC, PAU, Ludhiana

The proposed land use plan has been shown in Drg. No. DDTP(R) 9/2010 , dated 15.10.2010.

#### 7.5.1 Residential

Keeping in view the trend of growth of residential areas and to meet with the demand of future growth some potential pockets have been identified suitable for residential purposes. At LPA level a total area of 2866.50 hectares (including urban and rural) has been proposed for residential use which is 11.88 % of total LPA area as given above Table.

So in order to accommodate the projected population, residential areas are earmarked at various sites considering future potential nodes in the Roopnagar. Residential areas are mainly developed along Roopnagar- Morinda road, Roopnagar- Bela road, Roopnagar- Chamkaur Sabih road and a part along Chandigarh road.

# 7.5.2 <u>Commercial</u>

The area under existing commercial land use is 150.10 hectares which includes the commercial area within the city and LPA. In the proposed land use an area of 1567.55 hectares has been earmarked for commercial use.

#### **Commercial Mix**

The mixed land use zone is proposed on both sides of identified roads up to a depth of 200 meters from the boundary of road (i.e. proposed right of way). Mixed Landuse will be permissible along the road front up to a depth of 200 meters except the abadi deh of the village.

The mixed land use has been proposed on the following roads as shown on the proposed Land use Plan.

- Chandigarh Manali road (N.H-21)
- Roopnagar-Bela road
- Roopnagar- Chamkaur Sahib Road
- Roopnagar-Morinda road
- Roopnagar Bypass
- Nangal-Roopnagar Bypass

# 7.5.3 Industrial

With a view to provide fillip/boost to the economy of the town and to promote industrial activity in the region, a sizeable area of the order of 1.82 % of total LPA area has been proposed for the industrialization.

Industrial zone has been proposed along Roopnagar- Hoshiarpur road and along Chandigarh road. Present industrial growth trend and wind direction aspects are kept into consideration while planning industrial zones.

Industrial zone proposed along Roopnagar- Hoshiarpur road covers partially revenue esates of village Bana, Taunsa, Relmajra and Asron. Other pocket earmarked along Chandigarh road covers partially the revenue estates of village Mathahari.

#### Incentives for shifting of exiting industries:

Industries existing within the non designated industrial zone, which are in operation as on date of Master Plan notification, shift outside this zone to any of the designated industrial zone within the state of Punjab and generate at least the same number of jobs at the new location, will enjoy the following benefits:

1 No CLU, EDU or Licence Fee on the present site if used for plotted residential purposes provided the industry shifts within three years of the notification of the Master Plan. If used for any permissible land use other than plotted residential, the difference between CLU, EDC and Licence Fee of the new land use and plotted residential has to be paid. In case that particular land is put to a land use for which CLU, EDC or Licence Fee is less than the plotted residential, the difference between these fees / charges for the plotted residential and proposed land use shall not be payale by the Government / Urban Development Authority.

- 2 If the industry shifts in the subsequent two years of the above mentioned period of three years, if will enjoy 50% discount on CLU, EDC and Licence Fee on the present site if used for plotted residential purposes. If used for any permissible land use other than plotted residential, the difference between the CLU, EDC and Licence Fee of the new land use and that of 50% of plotted residential has to be paid. In case that particular land is put to land use for which CLU, EDC or Licence Fee is less than the plotted residential, the difference between the plotted residential and porposed land use shall not be payable by the Government / Urban development Authority.
- 3 No CLU, EDC or Licence fee on the new industrial site if the industry shifts within five years of the notification of the Master Plan.
- 4 After shifting to the new location, the type of such industry may change.

The Prescribed distance for residential development in the non designated industrial from existing red industries shall be as prescribed by the Department of Environment, Government of Punjab or Punjab Pollution Control Board.

Note:

- I. No industry in the Master Plan shall be permitted on a road having less than 40' ROW. In case, the existing road is less than 40' wide, it shall be widened to 40' by taking equal strip of land from both sides of the road.
- II. A minimum buffer of 15 meters of broad leaf shall be provided for segregating industrial zone from the residential zone. The provision of buffer strip shall be made by the owner of Land use which comes later.
- III. The standards prescribed by Punjab Pollution Control Board from time to would have to be met by all industrial units in addition to other specific conditions in terms of plot size, ground coverage, F.A.R., height, parking norms etc.
- *IV.* The existing industrial units falling under red category (as classified by Punjab Pollution Control Board) located in non-designated areas need to relocate to designated areas themselves within period of 10 years from date of publication of this Master Plan.

#### 7.5.4 <u>Recreational</u>

Parks and open spaces are the part of approved residential colonies/projects. So it is to be provided as per norms and standards from time to time as applicable in PUDA approved colonies and other govt. approved projects.

#### 7.5.5 Agricultural and Rural

An area of 17147.22 hectares has been proposed for rural and agricultural use.

#### Green buffer

The proposed area of the Local Planning Area Roopnagar under Green belts is 152.34 hectares.

• Forest

The proposed area of the Local Planning Area Roopnagar under Forest is 4201.19 hectare.

## 7.5.6 Traffic and Transportation

Traffic and Transportation is defines both existing and future patterns, typology of growth and development of the town. Traffic and Transportation Proposals aims at rationalizing the existing road network, creating a well defined hierarchy of roads, creating over-bridges, rationalizing the inter and intra town traffic, creating adequate parking spaces, developing well defined interface between different land uses, improving efficiencies in traffic movement within the town, minimizing delays etc in order to improve the operational efficiency.

In the light of the above approach, proposed land use and road network plans are incorporated in the Master Plan. The land in LPA, Roopnagar has been zoned for Residential, Commercial, Industrial, Rural and Agricultural purposes. Further, areas have been designated for important specific purposes like Public Utilities, Bus Stand, Truck Stand, Institutional, green buffer along existing Bye pass. However specific designations for public purposes like schools, hospitals, playground etc have not been earmarked. The major proposed road network has been proposed has been shown in drg. no. DDTP (R) 45/2011 dated 12.08.2011.(This drawing is superimposed on previous drawing no: DDTP (R) 09/2010 dated 15.08.2010.) It is proposed to follow up the Master Plan preparation by more detailed zonal plans.

#### 7.5.7 Proposed Road Network

The proposed Traffic and Transportation Plan of Roopnagar L.P.A is based on a welldefined road network of appropriate hierarchy in order to cater to the traffic needs of the urban centers and population living and working there. It includes redefining, strengthening and augmenting the existing road network and additional linkages to be created in order to rationalize the traffic and transportation within the town and areas proposed to be brought under urbanization. Keeping in view the future shape and size of Roopnagar urbanisable area, there is need for creating an efficient and effective system of transportation.

The existing network of radial roads passing through L.P.A has been retained and it is proposed for improvement/widening/strengthening. While demarcating the internal road network within L.P.A, efforts have been made to make optimum use of available road infrastructure and land available along the irrigation channels in order to minimize the cost of development and to ensure easy availability of land for the proposed road network. In order to meet the future demand of traffic and transportation for the Roopnagar Municipal Council and the LPA, following hierarchy of roads has been proposed:

| Category of Road | Right Of Way(feet) | No Construction<br>Zone | Description       |
|------------------|--------------------|-------------------------|-------------------|
| R-1              | 200                | 5 mts                   | Roopnagar Bypass  |

Table No.50: Existing Road Hierarchy, L.P.A. Roopnagar

Note: - No Construction zone should be beyond the proposed road widening.

All these roads shall have 5mts no construction zones on both sides after ROW as per notification no.: 8/2/2001-4HGI/3112 dated 27<sup>th</sup> September 2010 and as per amended from time to time.

#### National highway

Chandigarh-Manali road (NH-21) passes through the city. For the smooth flow of traffic Central verge is being constructed on National Highway-21.

#### State Highway

Roopnagar- Hoshiarpur road (SH-24) with ROW varying from 52feet -88 feet passes through the city.

#### **Major District roads**

Major District roads passing through the city are Morinda-kurali road and Roopnagar - Nurpur Bedi road.

#### **Other District road**

It covers roads namely Roopnagar- Bela road, Roopnagar-Chamkaur Sahib road, Roopnagar-Morinda road, road connecting LPA boundary and NH-21 passing through the revenue estate of villages Solkhian, Khabra and Singh and other District road connecting LPA boundary and NH-21 passing through the revenue estate of villages Rangilpur, Gandhon Kalan, Raipur Patti and Mianpur.

**R1:** Presently Roopnagar Bypass has width of 100 feet, which has been has been proposed to be widened to 200 feet (RI).

#### **R2: Other Major roads**

Road along SYL and Nangal Roopnagar Bypass have been proposed as second hierarchy roads (R-2) (100' wide).

#### **R3: Other minor roads**

The lower hierarchy roads of R-3 (80' wide) which covers road starting from Roopanagar Bypass moving through the revenue estates of villages Bara Phool, Nunowal, Rattanpur, Chhota Surtapur, Chhota phool and Budha Bhora and touches finally Roopnagar-Bela road.

**R-4** category has been proposed to provide accessibility upto interior areas.

All the existing link roads are to be widened **proportionate on both sides** to 60 feet. The proposed road network as explained above has been shown in DRG No. DTP (R) 11/2010 Dated 15/10/2010.

#### Note: Road widening will be done proportionate on both sides.

#### **Proposed ROB/ Flyover**

One rail over bridge is under construction over Nangal-Kurali railway line and N.H.-21.

#### 7.5.8 Utilities and Services

The area under Utilities and Services Use within LPA is 4.82 hectares.

#### 7.5.9 Government

The area under Government Use within LPA is 94.64 hectares.

#### 7.5.10 Public & Semi Public Use

The proposed area under Public and Semi Public Use within LPA is 730.91 hectares.

#### • Sports and leisure

The existing sports infrastructure covers an area of 26.45 hectares. In the proposed land use plan an area of 308.06 hectares has been earmarked for sports and leisure.

# CHAPTER VIII

# 8-A ZONING REGULATIONS

# **8.0 Section – I: Zoning Regulations**

Chief Town Planner, Punjab being the planning agency designated under Section 57 of the Punjab Regional and Town Planning and Development (Amendment) Act, 2006 for the Local Planning Area declared under Section 56 of the said Act, following the requirement under clause (d) of sub section 1 of Section 70 of the Punjab Regional and Town Planning and Development (Amendment) Act, 2006 hereby makes following Zoning Regulations as a part of the Master Plan prepared for the Local Planning Area.

The zoning regulations proposed under this Master Plan are primarily concerned with the control of land use. The proposed land use plan includes following land use zones:

- Residential
- ➢ Commercial
- Mixed land use
- > Industrial
- Recreational
- Rural and Agricultural

In addition specific designated uses have been shown in respect of proposed traffic and transportation, utilities, governmental and public and semi-public facilities etc.

As explained earlier since sub – division of land, design and construction of buildings is being controlled through well-established building byelaws / regulations by the concerned authorities. The zoning regulations under the Master Plan are seen as the guiding parameters for these agencies to ensure that the development permitted by them is in conformity with the Master Plan.

#### Use and development of land to be in conformity with Master Plan:

As provided under Section 79 of the Punjab Regional and Town Planning and Development (Amendment) Act 2006, after coming into operation of this Master Plan, no person shall use or permit to be used any land or carry out any development in any area otherwise than in conformity with this Master Plan.

Provided that the competent authority may allow the continuance of any use of any land, for a period not exceeding ten years, upon such terms and conditions as may be provided by regulations made in this behalf, for the purpose and to the extent, for and to which it was being used on the date on which this Master Plan came into operation.

# 8.0.1 Short Title, Scope, Extent & Commencement

#### 1. Title

These regulations shall be called the Zoning Regulations for Local Planning Area Roopnagar 2009 (herein after referred to as "these regulations").

#### 2. Scope of the regulations

The scope of these regulations is limited to defining permissible land use activities in various land use zones depicted in the proposed land use plan forming part of the Master Plan. Other aspects of development such as sub - division and layout of land or intensity of development measured through FAR, ground coverage, parking requirements, building design and construction etc. will be governed by other Acts and regulations promulgated by Government from time to time. Competent Authorities under such regulations shall ensure that the developments permitted by them are in conformity with these regulations.

#### 3. Jurisdiction

These regulations shall apply to all "development" in the Local Planning Area Roopnagar declared under Section 56 of "The Punjab Regional and Town Planning and Development (Amendment) Act, 2006" vide Notification No. 12/71/2006-4HG1/3224 dated 9.5.2008 and amended Notification No. 12/71/06-4 HGI/750 dated 27/2/09.

#### 4. Date of coming in to force

These regulations shall come into force on the day on which the designated Planning Agency publishes the final Master Plan along with these regulations in the *Official Gazette* after obtaining the approval of the State Government under sub section (5) of Section 70 of "The Punjab Regional and Town Planning and Development (Amendment) Act, 2006".

Till such approval, the authorities considering the application for permission for development shall give due regard to the draft proposals including these regulations.

# 8.0.2 Definitions

For the purpose of these zoning regulations, the following definitions, unless the context otherwise requires, shall apply:

- 1 **"Act":** means "The Punjab Regional and Town Planning and Development (Amendment) Act, 2006 "(Punjab Act No.11 of 1995).
- 2 "Government": means the Government of the State of Punjab.
- 3 "Chief Town Planner": means the Chief Town Planner of the Department of Town & Country Planning, Punjab or any other officer to whom his powers are delegated.

- 4 "Planning Agency": means the Chief Town Planner, Punjab designated as such under Section
   57 of the Punjab Regional and Town Planning and Development (Amendment) Act, 2006 for
   Local Planning Area Roopnagar.
- 5 **Competent Authority:** Competent Authority shall mean any person or authority appointed by the stage government, by notification to exercise and perform all or any of the powers and functions of the competent authority as per section 2 (m) of the "Punjab Regional and Town Planning and Development (Amendment) Act, 2006.
- 6 **"Existing Land use Plan":** means the plan showing the different land use existing at the time of preparation of the Existing Land Use Plan of Local Planning Area, Roopnagar and as indicated on Drawing No. DTP (R) 8/2010 dated 15.08.2010 or as amended and notified from time to time.
- 7 Local Planning Area": means the Local Planning Area declared under section 56(1) of the Punjab Regional and Town Planning and Development (Amendment) Act 2006 vide Notification No. 12/71/2006-4HG1/3224 dated 9.5.2008 and amended Notification No. 12/71/06-4 HGI/750 dated 27/2/09 published in the Punjab Govt. Gazette.
- 8 **"Non-Conforming Building or Use":** means use in respect of any land or building in the Local Planning Area, the existing use of which land or building is contrary to the prescribed land use in the Master Plan and its zoning regulations.
- 9 "Proposed Land use Plan": means the plan showing the proposed / admissible uses for different areas and land use zones covered in the Local Planning Area, Roopnagar and as indicated on drg. no. DDTP (R) 45/2011 dated 12.08.2011.(This drawing is superimposed on previous drawing no: DDTP (R) 09/2010 dated 15.08.2010.) or as amended and notified from time to time.
- 10 "Zoning Plan": means the plan of an area or part thereof or supplementary layout plan approved by the Chief Town Planner, Punjab and maintained in the office of Competent Authority showing the permitted use of land and such other restrictions on the development of land as may be prescribed in the zoning regulations for any part or whole of the area such as sub-division of plots, open spaces, streets, position of protected trees and other features in respect of each plot, permitted land use, building lands, height, coverage and restrictions with regard to the use and development of each plot in addition to such other conditions as laid down in these regulations hereafter.
- 11 "**Mixed land use**": means the multiple use of land (except orange & red category industry) is allowed to co-exist subject to fulfillment of environmental safeguards.
- 12 **"High Technology Park/I.T. Park":** This will largely be high technology, value added kind of industrial development in the form of science park, Business Park and R & D parks. The target industries include IT parks and bio-technology industries.
- 13 **"Fashion Technology Park":** Means where knowledge based infrastructure to inspire the global fashion community catching all segments of designing, manufacturing, marketing, R & D, logistics, broad forecasting are all under one roof.

- 14 **"Knowledge Park":** A platform for interaction and provision of clustering opportunities to all the Organizations, Institutions, Hotels, Restaurants, Hospitals. Real Estate Agency clubs, Business Parks with main objective of facilitation of better technology for public and private sector.
- 15 **"Logistic Park":** A Logistic Park is an area within which all activities related to transport, logistics and distribution of goods for both national and international transits are carried out by various operators on a commercial basis.
- 16 **"Farm House":** means a building allowed on a minimum holding of 2.5 acre agricultural land for residential and agricultural activity of the land holder.
- 17 "Atta Chakki": is categorized as service industry where:
  - Grinding of only food grains is carried out through the process of crushing under the load and rotational movement of two plates or blocks.
  - The maximum electric load does not exceed 20 kW.
  - The Atta Chakki shall be used for grinding food grains supplied by the consumers only and no sale / purchase of food grains / flour shall be carried out by the Atta Chakki owner at commercial level.
  - The Atta Chakki shall only be permitted on roads having minimum 40 feet ROW.
- 18 **"House Hold Industry":** means house hold occupation / industry conducted only by family members / persons residing in the dwelling with or without power and not contrary to the provisions of the Water Pollution (Prevention and Control) Act 1974, Air Pollution (Prevention and Control) Act 1981 and Environment (Protection) Act 1986.
- 19 **"Industry":** means a specific branch of manufacture and trade which includes green, orange and red category and any other category as categorized by PPCB/Department of Industries or as amended from time to time. It excludes mining and quarrying.
- 20 "Cottage Industry": Industrial units employing less than 10 workers, not creating excessive traffic and not omitting fumes, noise and effluents injurious to the existing sewers and not contrary to the provisions of the Water Pollution (Prevention and Control) Act 1974, Air Pollution(Prevention and Control) Act 1981 and Environment (Protection) Act 1986.
- 21 **"Public and semi-public activities":** means governmental / semi-governmental offices, educational / cultural, religious and medical / health institutions, community centers etc. excluding privately run establishments.

# Terms and phrases used, but not defined in these regulations, shall have the same meaning as assigned to them in Act.

#### 8.0.3 Land use zones

The proposed land use plan incorporated in the Master Plan of LPA Roopnagar depicts the following land use zones:

- Residential
- Commercial

- Mixed land use
- Industrial
- Recreational
- Rural and Agricultural

Besides this the following designated land uses have also been depicted on the proposed land use plan:

- Traffic & Transportation
- Utilities
- Government
- Public, Semi-Public

# 8.0.4 Land use classes

For the purposes of these regulations various land uses are grouped into following land use classes:

| Sr. No. | Land use Class                              | Use Class Code |
|---------|---|----------------|
| 1       | Housing                                     | А              |
| 2       | Trade and Commerce                          | В              |
| 3       | Manufacturing                               | С              |
| 4       | Transport, Storage and Warehousing          | D              |
| 5       | Offices                                     | Е              |
| 6       | Education, Training and Research Institutes | F              |
| 7       | Healthcare facilities                       | G              |
| 8       | Recreation, Entertainment                   | Н              |
| 9       | Public utilities and services               | Ι              |
| 10      | Agriculture, forestry and fishing           | J              |

# 8.0.5 Use provisions in land use zones

Following table describe the land use classes and their further sub – classes permitted in various land use zones. The *shaded cells* in the table indicate that the use is generally permissible. A *number* in the cell indicates the conditions listed at the end of the table subject to which the use is permissible.

| LAND USE ZONES AND PERMISSIBLE LAND USES |             |             |            |                |            |              |                           |
|--|-------------|-------------|------------|----------------|------------|--------------|---------------------------|
| Use class                                |             |             |            | Land u         | ise zones  | 6            |                           |

|             | Minimum width of the access road for all public places and involving "A                    | Assembly"      | occupanc     | v shall b      | e 60 feet  |              |                           |

The activities / uses not mentioned in the above table but found compatible for a particular land use zone shall also be permissible with permission of the competent authority.

# 8.0.6 Designated uses

Following uses have been specifically designated in the proposed land use plan:

- Traffic and Transportation
- Utilities
- Public and semi-public facilities

# 8.0.7 Use provisions in designated areas

Following uses are permissible in the designated areas mentioned above:

i) Traffic and Transportation: Permissible uses

Rail yards, Railway Station and sidings, Transport Nagar (including Post and Telegraph Offices and Telephone Exchange, Dhabas, Labor Yards, Areas for loading and unloading, Stores, Depots and Offices of goods booking agencies, Petrol Filling Station and Service Garages, Parking Spaces, public utilities and buildings), Bus Terminus and Depot, Bus Stop Shelter, Taxi / Tonga / Rickshaw / Scooter Stands, Parking Spaces.

ii) Utilities: Permissible uses

Water Supply, Drainage, Storm Water, Waste Processing and disposal, Electricity, Communication Systems and related installations etc.

#### iii) Public and semi Public facilities: Permissible uses

Governmental and semi-Governmental offices, Governmental Administrative Centre's, Secretariat, Educational – Cultural and Religious Institutions including Theatres, Auditoriums etc., Medical Health Institutions, Community Centre's, Club, Orphanage, Old Age Home, Bank, Police Station etc.

# 8.0.8 Special Conditions

- The siting of Petrol Pump / Filling Station shall be subject to instructions/guidelines of IRC/MORTH/TCPO /Punjab Govt. issued from time to time.
- Minimum width of access road for warehousing uses shall be 60 feet.
- All public and semi-public uses in residential zone shall be located on independent plots with minimum access of 60 feet.
- All types of industries permitted in the industrial/ mixed land use zone are subject to the fulfillment of conditions issued by industries department / Punjab Pollution Control Board from time to time.

# 8.0.9 Residential Densities

Residential zone is divided into two sub-zones as shown on proposed land use plan drg. no. DDTP (R) 45/2011 dated 12.08.2011.(This drawing is superimposed on previous drawing no: DDTP (R) 09/2010 dated 15.08.2010.) The maximum average residential density of different sub-zones which given as under:

 Table 9: Proposed Residential Density for LPA, Roopnagar 2031

| Density zone            | Proposed Residential density       |
|-------------------------|------------------------------------|
| High Density Zone (RD1) | Not more than 300 persons per acre |
| Low Density Zone (RD2)  | Not more than 200 persons per acre |

In case of standalone group housing projects/chunk sites reserved for group housing purpose, maximum average residential density @ 60 dwelling units per acre shall be permissible irrespective of the density zone prescribed in the Master Plan. The areas zoned for residential use are not derived from affordable densities but are based on potential for growth. A large proportion of the areas of these density zones particularly on the periphery may remain undeveloped by 2031.

# 8.0.10 Implementation of these regulations

- All authorities competent to grant permission for layout or sub division of land or construction of building or development of land in any other form shall ensure that the permitted development is in compliance with these regulations.
- Land owners desirous of developing their land can obtain, by applying to the designated authority in writing and giving details of their land along with necessary maps, a list of permissible uses.

• The land owners proposing development of certain uses on their land shall obtain a certificate of "Compliance with Master Plan" from a designated authority.

## 8.1 <u>Section – II: Development Control regulations</u>

The purpose of the Development Control Regulations (DCR) is to guide developers and end – users within the Local Planning Area to strive for a quality and environment – friendly development.

These Development Control Regulations are applicable to new and future developments and developers shall have to abide by the zoning and planning intentions of the Master Plan. *However, development proposals / projects that have been granted approval (including CLU)* by the Competent Authority before coming these into operation will continue to be honored subject to the terms and conditions of approval and shall not be affected by these controls.

The F.A.R height, ground coverage, parking areas, set back, width of road and frontage of site etc. regarding residential, commercial, institutional, industrial or any other use for areas existing within M.Cl. limits shall be governed by Municipal bye-laws.

Some of the key regulations currently in force are reproduced below.

#### 8.1.1 Residential

Minimum area and development of a residential colony within Master Plan Roopnagar shall be as per the provisions of PAPR Act, 1995 and guidelines issued by govt. from time to time:

| Category            | Minimum Plot size   |
|---------------------|---------------------|
| Residential Plotted | 5 acres             |
| Group Housing       |                     |
| General             | 2 acres independent |
| EWS                 | 2.5 acres           |

Note:

(i) Minimum area of colony within M.Cl. limits shall be as per Local Govt. norms.

- (ii) The lowest hierarchy street within residential zone of Master Plan shall be minimum 35 feet wide or as prescribed in the guidelines issued by govt. from time to time.
- (iii) The saleable area of any plotted residential colony shall be as per the provisions of PAPR Act, 1995 or as amended from time to time.

| Minimum Plot size       |  |
|-------------------------|--|
| a) For General Category | 2 acres  |
| b) For EWS              | 2.5 acres  |
| 2.1.1.1.1 Minimum       | 2.1.1.1.2 For group housing stand-alone projects, minimum width of approach road     |
| Road width              | is 60' but the promoter is required to leave space from his own land for widening it |
|                         | to 80' and the space so left shall be public space. In the planned colony, group     |
|                         | housing shall not be permissible on a road less than 60' wide.                       |
| Minimum Frontage        | 20 meters  |
| Permissible FAR         | 1:1.75   |
| Permissible Height      | There shall be no restrictions on the height of building subject to clearance from   |
|                         | Air Force Authority and fulfillment of other rules such as setbacks, distance        |
|                         | between buildings etc. However, structural safety and fire safety requirements as    |
|                         | per N.B.C. shall be compulsory.  |
| Parking provisions      | For group housing developments, the requisite parking provision is 1.5 ECS per       |
|                         | 100 sq. m of covered area subject to maximum of 3 ECS per dwelling unit.             |

#### 8.1.1.1 Group Housing (outside M.C. limits)

#### Note:

- 1. Construction of residential houses sold by promoters on floor basis shall also be considered as Group / Flatted housing developments and parking requirements shall be as per the norms applicable to the group housing.
- 2. For group housing within M.C. limits norms of local government shall be applicable.

#### 8.1.1.2 Farm House

| Minimum agricultural land holding | 2.5 acres*           |
|-----------------------------------|----------------------|
| FAR                               | 0.04                 |
| Ground Coverage                   | 2%                   |
| Number of storey's                | 2                    |
| Height                            | Single Storey 18'-0" |
|                                   | Double Storey 28'-0" |
| Hard Surface                      | 10%                  |

\*Area other than under the built up farm house shall be exclusively used for agricultural and its allied activities

#### 8.1.2 Commercial

#### At local level

There shall be provisions for small scale, double storey commercial subject to the condition that abutting road shall have a minimum width of 60 feet with minimum 20 feet front setback from road for parking purposes. However the area requirements for low rise commercial

developments within M.C. limits shall be as per the local body/Municipal council's rules and regulations.

#### **Stand-Alone Commercial Complexes**

For stand-alone commercial complexes with height more than double storeys, the additional criteria listed in following table shall apply.

| Item                    | Permissible Norms / Standards  |
|-------------------------|--|
| Minimum Plot size       | 1000 sq. m   |
| Minimum Road width      | 80 feet  |
| Minimum Frontage        | 20 m   |
| FAR                     | 1:1.75   |
| Maximum Ground coverage | 40%  |
|                         | For projects with no multiplexes, the minimum parking shall be 2 ECS per 100 sq m of covered area (including circulation area)   |
| Parking                 | <ul> <li>For projects with multiplexes/cinemas/theatres, the minimum parking shall be:</li> <li>b)3 ECS per 100 sq. m of covered area, in respect of the covered area of the multiplex component + 30% of the total covered area of that component and</li> <li>c) 2 ECS per 100 sq. m of covered area, in respect of balance commercial component and circulation area</li> </ul> |
|                         | Total parking requirement shall be provided in the compulsory front set back and within the development site boundary or in the basement.<br>If the site area is one acre or above, minimum 15% of the total area is to be reserved for  |
| T - u da - u da -       | landscaping purposes   |
| Landscaping             | The minimum setback distance is to comply with the existing norms and standards.   |

**Criteria for stand – alone commercial complexes (more than double storeys)** 

Note:

- 1. The ground coverage, F.A.R., Height of the building and parking norms shall be as provided in the local body/municipal building byelaws, if the project is located within M.C. limit of the town.
- 2. The ECS shall be counted as below:
- 23 square meters for open parking
- 28 square meters for parking under stilts on ground floor
- 32 square meters for parking in the basement.

These commercial facilities are intended to serve the needs of local residents only and will not be shown separately on the Master Plan. Instead, they are subsumed under the predominant residential land use.

#### 8.1.3 No Construction Zone along major roads

All properties within the jurisdiction of LPA Roopnagar that abuts **Major District roads** (Scheduled Roads), intercity roads and other proposed roads of category R1 & R) shall have access through service lanes and shall have no construction zone as below irrespective of the Land use shown in the proposed land use plan drg. no. DDTP (R) 45/2011 dated 12.08.2011.(This drawing is superimposed on previous drawing no: DDTP (R) 09/2010 dated 15.08.2010.)

| Sr. No | Category of road  | Proposed Right of way | No construction zone on both  |
|--------|---|-----------------------|-------------------------------|
|        |   | of road (in feet)     | sides of R.O.W. within and    |
|        |   | outside M.C limit     | outside M.C. limits (in mts.) |
| 1.     | Chandigarh-Manali (NH-<br>21) Road                              | 180                   | 5                             |
| 2.     | Roop Nagar – Hoshiarpur<br>Road (SH-24)                         | 88                    | 5                             |
| 3.     | Kurali-Morinda (SH)   | 18                    | 5                             |
| 4.     | Roopnagar-Bela road<br>(ODR)                                    | 66                    | 5                             |
| 5.     | Roopnagar- chamkaur<br>Sahib road ( Along with<br>Sirhind road) | 23                    | 5                             |
| 6.     | Roopnagar- Morinda Road<br>(Old)                                | 88                    | 5                             |
| 7.     | Roopnagar- Nurpurbedi<br>Road (ODR)                             | 37                    | 5                             |
| 8.     | Roopnagar Bypass  | 200                   | 5                             |
| 9.     | Roopnagar Nangal Bypass   | 100                   | 5                             |
| 10.    | Road along SYL  | 100                   | 5                             |
| 11.    | Road connecting<br>Roopnagar Bypass and<br>Bela road.           | 80                    | 5                             |

Note:

Where widening of existing road is proposed, the land shall be taken proportionately equally from both sides of existing roads.

## 8.1.4 Institutional Buildings

The development controls for institutional buildings are tabulated as follows:

| Item               | Permissible Norms / Standards  |
|--------------------|--|
| Plot size          | Area and size shall be as per the affiliation authority norms or 5000 sq.mt as prescribed by |
|                    | Punjab government policy, whichever is more.   |
| Frontage           | 200 feet   |
| FAR                | 1:1  |
| Ground Coverage    | 40%  |
| Road width         | The minimum road in front of institutional developments should be 60 feet or as proposed in  |
|                    | the master plan. The only exceptions are nursery and primary schools.                        |
| Parking provisions | For institutional developments, the requisite parking provision is 1 ECS per 100 sq m of     |
|                    | covered area if the project is covered under notification no.17/17/5-Hg2-311 dated           |
|                    | 11.01.08.  |

Note: Other building regulations shall be governed by the zoning plan approved by the competent authority.

### 8.1.5 Industrial

Permissible ground coverage, floor area ratio, height, parking etc. shall be as per the norms/ building bye-laws for industries of Punjab State Industries and Export Corporation

| Permissible Ground coverage |  |
|-----------------------------|--|
| For the first 2420 sq. yds. | 50% of the site  |
| For the next 2420 sq. yds.  | 33% of the site  |
| In excess of 4840 sq. yds.  | 25% of the site  |
| FAR                         | 1:1.0  |
| Parking                     | 1 ECS / 100 sq. m of covered area  |
| Road width                  | The minimum road width for industrial unit shall be 40 feet.               |
| Height                      | There shall be no restrictions on height of building subject to clearance  |
|                             | from Air Force Authority and fulfillment of other rules such as setbacks,  |
|                             | distance between buildings etc. However, structural safety and fire safety |
|                             | requirements as per N.B.C. shall be compulsory.                            |

#### Note:

- 1. Residential component in the industrial plot / premises shall not exceed 5% of the area of the site and shall be within the maximum permissible covered area.
- 2. No new industry in the Master Plan shall be permitted on a road having less than 40'-0" ROW or as specified in the master plan. However, in case the existing road width is less than the minimum specified width as per Master Plan or 40'-0" wide then the proportionate land on both sides shall be safeguarded for widening to comply with the minimum requirement. In case of industries existing before the final notification of the master plan, if the road width is less than 40 feet then the owner of the site/ industry shall give a self-declaration for leaving the required strip of land from his ownership as and when required by the concerned authority.
- 3. Industrial / IT Park shall have minimum 10 acres area. In IT Park, IT component shall have FAR 2. In industrial park, for an industry component FAR shall be 1 and other components shall have FAR as mentioned under different uses in the Master Plan.

#### 8.1.6 Environmental considerations

1. Minimum buffer of 15 meters green belt of broad leaf trees should be provided around the boundary of village abadies falling in industrial zone of Master Plan. A buffer strip of 15 meters of broad leaf trees shall also be provided between residential areas and red category industries falling in industrial zone of Master Plan, boundaries of which are located within 100 m from the boundary of such areas. It is clarified that 15 meter buffer shall be provided by the owner of the project who comes later.

- 2. All residential colonies, commercial establishments like shopping malls, multiplexes etc. shall maintain a minimum distance of 250 meters from the hazardous (maximum accident hazardous) industries notified by the competent authority. The distance shall be measured from source of pollution / hazard in the industrial premises to the building lines as per zoning plan of the colony / complex. However for specified type of industry like Rice Sheller / sella plants, stone crushers, hot mix plants, brick kilns etc. standards prescribed by PPCB or any other agency shall apply.
- 3. Gap of at least 100' should be left between the railway boundary and the nearest private buildings so as to avoid smoke and noise nuisance to these adjacent buildings. Wherever it is not possible to leave a road width (minimum 20') may be left between the railway boundary and the nearest adjacent buildings, the standards prescribed by the Railway Board conveyed by Divisional Supdt. Northern Railway, Ferozepur to the Secretary Local Self Govt. Punjab vide their letter dated 22.09.71

#### 8.1.7 Other development controls and guidelines required

- I. Expansion of village Abadies: Contiguous expansion of village abadies in nonresidential zones of Master Plan is permissible up to the extent shown in the Master Plan.
- II. The contiguous expansion of village abadies falling under agricultural zone of Local Planning Area is also permissible to accommodate the natural growth of village abadies.
- III. Regulation for village abadi: Special building regulation shall be prepared for the development and regulation of an area falling within the Lal Dora or phirni of the villages falling in the Local Planning Area.
- IV. The existing High Tension lines shall be shifted along the road but outside the Right of way to ensure unhindered ROW for traffic and other services for all times.
- V. Minimum 5 meters wide green strips on each side of minor drain shall be maintained and other major water bodies shall have minimum 30 meters green strips on each side. Realignment of water bodies shall be permissible wherever feasible, subject to the certification by the Drainage / Engineering Department to ensure free flow of storm water. After any such realignment, the river mouth, the river bed and the green strip on

either side shall be maintained at least to the minimum prescribed level. In these green strips, golf course, sports and recreational activities shall be permissible but no construction would be allowed. The supporting facilities for these activities shall be constructed outside the green strips.

#### 8.1.8 Transferable Development Rights

To facilitate development, it is necessary to accord top priority to the implementation of public utilities and infrastructure (such as roads, parks, green belts etc.) which will in turn encourage urbanization.

However, the respective technical agency or authority will not be able to proceed with its implementation programs until the ownership of private land affected by these public utilities and infrastructure has been transferred to the state or to the relevant authority(s).

Acquisition of private land for this purpose can be carried out through one of the following options:

- Cash compensation can be made to affected land owners whose land is to be acquired.
- A government approved land pooling scheme can be implemented.
- Transferable Development Rights (TDR).

Under the TDR scheme, the affected land owner(s) shall be entitled to additional FAR for the development of his balance land parcel at a rate of 1:1.The additional FAR will not be subjected to any CLU, EDC or license / permission fees. The land owner(s) also has the option to sell it in total or in parts to a third party.

All the records of transactions administered under the TDR scheme shall be maintained by the state and / or relevant authority(s), based on the precedence set in Mumbai Maharashtra.

The TDR scheme shall be restricted to development projects for public infrastructure and facilities which shall be announced from time to time. The additional FAR shall not be transferable from one L.P.A to another.

Detailed policy guidelines on the operation and implementation of TDR Scheme shall be prepared and announced by the competent authority in due course of time.

### 8.2 <u>Section III: Exceptions</u>

- 1. Uses determined by the Chief Town Planner, Punjab as compatible with uses permissible shall be allowed in respective zones.
- 2. Development / projects approved prior to coming in to force of these regulations shall be deemed to be in compliance with these Regulations.
- 3. The site on which various projects have been approved or whose change of landuse has already been permitted by competent authority/Govt., such sites shall be deemed to be adjusted as sanctioned/ permitted.
- 4. Use of land covered under Optimum Utilization of Vacant Government Land (OUVGL) Scheme or any other project of the State / Central Government shall be determined by the Government at any appropriate time notwithstanding the provisions of this Master Plan.
- 5. In the event of conflict in interpretation of data within the study area, the information in the GIS format will be deemed as the accurate version and will prevail.
- 6. In case the area of a project falls partially under no construction zone along a water body, relaxation of maximum up to 5% on the total area of the project shall be allowed towards calculation of saleable area in lieu of the area falling under the no construction zone. In case, the area falling under no construction zone is less than 5% of the total area of the project then the relaxation shall be proportionately less.
- 7. The buildings / premises for which the existing (present) land use has been retained as such in the Master Plan may continue to operate without time limit. However, in case the present use of the buildings / premises is discontinued (partially or wholly) these buildings / premises or part thereof may be put to any compatible use (except industry) with the surrounding use zone in the Master Plan provided it fulfills the other development regulations / controls as laid down in the Master Plan or as prescribed by the Govt. /Local Body from time to time.
- 8. Within the existing M.C. limits the buildings rules notified by the local Govt. shall be applicable. i.e. The F.A.R., height, ground coverage ,parking requirements, set backs, width of and frontage of site etc. regarding residential, commercial, institutional, industrial or any other use for areas existing within M.C. limits shall be governed by municipal rules/bye –laws.
- 9. Any change in the above said development controls notified or to be notified in future by the concerned development authority shall have overriding effect on the development controls mentioned above.

#### ANNEXURE -I

GOVERNMENT OF PUNJAB partment of Housing and Urban Development (Housing Branch-I)

#### Notification

12/71/2006-411G1/324 date 9.5.08 the Governor of Punjab is pleased to alter the boundaries of social Planning Area, Roopnagar within the meaning of Sub Section 7 of Sector 56 read with the sub-section 1 of section 56 of Punjab Regional and Town Planning and Development (Amendment) Act, 2006: The Total area of proposed Local Planning Area Roopnagar is 24265(Heets) (59969 Acres.) Which includes Roopnagar city, adjoining 129 villages and one Town The Schedule of boundaries of Local Planning Area Roopnagar is sunder.

#### Schedule of Boundary of Local Planning Area, Roopingar

NORTH:

EAST:

Starting from point 'A' which is formed at the intersection of northern boundary of village Garh Bagga (H.B.No.522) with the Noorpur Bedi-Roopnagar road, then moving towards East along the North-eastern boundary of village Garh Bagga (H.B.No.522) along river Satluj and moving along the North-eastern boundary of village Alampur (H.B.No.33) then moving along northern and eastern boundaries of village Malikpur (H.B.No.35) crossing the Nangal-Roopnagar road with North-eastern boundary of village Malikpur (H.B.No.35)

From point 'B' moving (cwards South eut.i-g across Bhakura canal and then moving along the North-eastern boundary of village Malikpur (H.B.No.35), and South-eastern boundaries of village Lachal (H.B.No.340) then moving along the Eastern boundaries of village Bairanpur (H.B.No.350), village Dargah Shah Khal'dbinwalid (H.B. No. 351), village Khalidpur (H.B.No.52), village Majri (H.D No.353), village Kotla Nihang 'H 3.No. 150) and Village Phoolpur Garewal (H.B. No. 181) then crossing the Sugh Rao Nadi and moving along the Eastern boundaries of village Thauna (H.B.No. 190), village Mianpur (H.B. No. 194), village Akalgarh Urf Burjwala (H.B.No. 202) and moving along the Eastern boundaries of village Rangarh alias Dekwala (H.B. No. 203) crossing ine Budki Rao Nadi and then moving along Eastern boundaries of village Chararian (H.B.No.207) and then moving along common boundary of District S.A.S Nagar and District Roopnagar crossing Roopnagar-Sirhind railway Ine and Siswan Nadi upto the point 'C' which is formed at the intersection of Roop Nagar-Kharar road with South-easterern boundary of village Charlied (H.B.No. 120) and common boundaries of Distr. S.A.S.Nagar & Distr. Roopnagar. 205 J()

## Field Rig 20 J

ा। रिप्रावं विष्ठ भी।

Form point C moving towards South-west along the common boundary of Distr. Koophagar & Distr. S.A.S.Nagar and South-western boundaries of village Charheri (H.B.No.120), village Bhagowal (H.B.No.119) and Eastern boundaries of village Behdali(H.B. No. 116), village Dhianpura (H.B. No. 115) Intersepting the Kurali-Sirhind Railway line and Kurali Morinda road than moving to wards southern, – Western Boundary of Village Dhianpura (H. G.-115) crossing Kurali – Morinda road and then Kurali-Sinhind Railway line and then further moving along South-western boundaries of village Behdali (H.B.No.116), village Paprali (H.B.No.121), village Sota' (H.B.No. 224),village Mugal Majri (H.B.No.223) and village, Goslan (H.B.No.225) crossing the Siswan Nadi and then moving along Western boundaries of village Goslan (H.B.No.225),village Khabra (H.B.No.216), village Solkhian(H.B.No.317), village Asmanpur (H.B.

From the comparative table of norms and space standards as given above, the norms suggested by UDPFI Guidelines have been found more suitable for the preparation of Master Plan Roopnagar because of the following reasons:

- The norms and standards suggested by UDPFI Guidelines are more detailed and cover "aunost each physical and social infrastructure as compared to Present Master Plan Zoning Regulation /Govt. policies
- Norms and standards suggested by UDPFI Guidelines are more realistic and suit to local conditions such as prevailing development controls, availability of land, land prices etc.
- UDPFI Guidelines suggest different norms and standards for different category of towns like small and medium towns, large cities and hill areas which is not available in other guidelines.
- The Norms and standards of Present Master Plan Zoning regulation are not detailed and do not cover the whole of activities, hence are not being adopted.
- Norms and standarde suggested by Delhi Master Plan have not been found suitable for LPA, Roopnagar because these norms are of higher level, formed especially for Mega city like Delhi, where development controls are very tight, population is more than 1.25 crores and the land is scarce and costly.

#### Note:

The norms and space standards as suggested by Punjab Govt policies from time to time shall have the overriding effect on the norms and standards of UDPFI Guidelines adopted for the preparation of Master Plan, Roopnagar

For the aspects which are not covered inder UDPFT Guidelines, the norms and standards as suggested by Master Flan zoning Regulations shall be adopted and where these zoning regulations are also silent, only in that case, the norms and standards suggested by Delhi Master Plan shall be followed.
